The Philosophy Of Pf Strawson Library Of Living Philosophers

Lewis Edwin Hahn

The Philosophy Of P.F. Strawson Library Of Living Philosophers:

The Philosophy of P.F. Strawson Lewis Edwin Hahn, 1998 The twenty sixth volume in the highly acclaimed Library of Living Philosophers series is devoted to the work of British philosopher of logic and metaphysician P F Strawson Following the Library of Living Philosophers series format the volume contains an intellectual autobiography twenty critical and descriptive essays by leading philosophers from around the world Strawson s replies to the essays and a bibliography of Strawson s works

Strawson and Kant Hans-Johann Glock, 2003 Sir Peter Strawson is not just among the greatest living philosophers but also the leading proponent of analytic Kantianism His seminal *Individuals* rehabilitated metaphysics as a respectable enterprise within analytic philosophy It also inaugurated a distinctly Kantian project descriptive metaphysics and placed the idea of transcendental arguments at the centre of epistemological metaphysical and methodological debate This was followed by *The Bounds of Sense* a brilliant and provocative discussion of the First Critique which continues to influence Kant scholarship by way of inspiration and opposition alike While there have been anthologies on Strawson and on transcendental arguments this is the first book to cover Strawson s relation to Kant as a whole It combines Strawson s own account of that relation with papers by eminent pupils admirers and critics Among the contributors are leading Kant scholars metaphysicians and historians of analytic philosophy The papers divide into three kinds Some of them Strawson Glock Hacker Bird Cassam Stroud deal with general questions concerning the nature of Strawson s Kantianism and of his rehabilitation of metaphysics Some Westphal Rosefeldt de Gaynesford Allison F rster are devoted to more specific topics in Kant In others Grundmann and Misselhorn Stern Hyman the focus is more on Strawson than on Kant The collection ranges from Kant interpretation and the history of analytic philosophy through philosophical logic metaphysics and epistemology to the philosophy of mind and aesthetics In this it reflects the range of Strawson s own philosophical interests and achievements The questions discussed are of central importance not just to Kant scholarship but also to contemporary analytic philosophy They include the question of whether philosophy can achieve a priori insights and whether these insights concern reality or our way of thinking about reality the nature of the self the character of aesthetic appreciation and of perception and the prospects for meeting the challenge of scepticism

The Broadview Introduction to Philosophy Volume I: Knowledge and Reality Andrew Bailey, 2019-06-18 This volume of *The Broadview Introduction to Philosophy* offers a thoughtful selection of readings in epistemology metaphysics and the philosophy of religion Substantial selections from important historical texts are provided including the entirety of Descartes s *Meditations* as are a number of contemporary readings on each topic Unlike other introductory anthologies the Broadview offers considerable apparatus to assist the student reader in understanding the texts without simply summarizing them Each selection includes an introduction discussing the context and structure of the primary reading as well as thorough annotations designed to clarify unfamiliar terms references and argument forms

Oxford Studies in Philosophy of Language Volume 1 Ernie Lepore, David Sosa, 2019-03-14 *Philosophy of*

language has been at the center of philosophical research at least since the start of the 20th century. Since that linguistic turn, much of the most important work in philosophy has related to language. But till now there has been no regular forum for outstanding original work in this area. That is what Oxford Studies in Philosophy of Language offers. Anyone wanting to know what's happening in philosophy of language could start with these volumes. **A Contextualistic Worldview** Lewis Edwin Hahn, 2001. This selection of articles by Lewis E. Hahn addresses the philosophical school of contextualism and four contemporary American philosophers: John Dewey, Henry Nelson Wieman, Stephen C. Pepper, and Brand Blanshard. Stressing the relatively recent contextualistic worldview which he considers one of the best world hypotheses, Hahn seeks to achieve a broad perspective within which all things may be given their due place. After providing a brief outline, Hahn explains contextualism in relation to other philosophies. In his opening chapter, as in later chapters, he expresses contextualism as a form of pragmatic naturalism. In spite of Hahn's high regard for contextualism, however, he does not think it would be good if we were limited to a single worldview. The more different views we have and the more different sources of possible light we have, the better our chances that some of these cosmic maps will shed light on our world and our place in it. *The*

Broadview Introduction to Philosophy Andrew Bailey, 2019-05-21. The Broadview Introduction to Philosophy is a comprehensive anthology that surveys core topics in Western philosophy, including philosophy of religion, theories of knowledge, metaphysics, ethics, social political philosophy, and issues of life, death, and happiness. Unlike other introductory anthologies, the Broadview offers considerable apparatus to assist the student reader in understanding the texts without simply summarizing them. Each selection includes an introduction discussing the context and structure of the primary reading, as well as thorough annotations designed to clarify unfamiliar terms, references, and argument forms. Canonical texts from the history of philosophy are presented alongside contemporary scholarship; women authors are included throughout.

Freedom, Resentment, and the Metaphysics of Morals Pamela Hieronymi, 2022-05-17. An innovative reassessment of philosopher P. F. Strawson's influential *Freedom and Resentment*. P. F. Strawson was one of the most important philosophers of the twentieth century, and his 1962 paper *Freedom and Resentment* is one of the most influential in modern moral philosophy, prompting responses across multiple disciplines from psychology to sociology. In *Freedom, Resentment, and the Metaphysics of Morals*, Pamela Hieronymi closely reexamines Strawson's paper and concludes that his argument has been underestimated and misunderstood. Line by line, Hieronymi carefully untangles the complex strands of Strawson's ideas. After elucidating his conception of moral responsibility and his division between reactive and objective responses to the actions and attitudes of others, Hieronymi turns to his central argument. Strawson argues that because determinism is an entirely general thesis true of everyone at all times, its truth does not undermine moral responsibility. Hieronymi finds the two common interpretations of this argument—the simple Humean interpretation and the broadly Wittgensteinian interpretation—both deficient. Drawing on Strawson's wider work in logic, philosophy of language, and metaphysics, Hieronymi concludes that his argument rests on an

implicit and previously overlooked metaphysics of morals one grounded in Strawson's social naturalism In the final chapter she defends this naturalistic picture against objections Rigorous concise and insightful Freedom Resentment and the Metaphysics of Morals sheds new light on Strawson's thinking and has profound implications for future work on free will moral responsibility and metaethics The book also features the complete text of Strawson's Freedom and Resentment

Language and Scientific Research Wenceslao J. Gonzalez, 2021-04-27 This book analyzes the role of language in scientific research and develops the semantics of science from different angles The philosophical investigation of the volume is divided into four parts which covers both basic science and applied science I The Problem of Reference and Potentialities of the Language in Science II Language and Change in Scientific Research Evolution and Historicity III Scientific Language in the Context of Truth and Fiction and IV Language in Mathematics and in Empirical Sciences Language plays a key role in science our access to the theoretical practical or evaluative dimensions of scientific activity begins with the mastery of language continues with a deepening in the use of language and reaches the level of contribution when it creates new terms or changes them in sense and reference This reveals the compatibility between objectivity in semantic contents and historicity in the progress of science This volume is a valuable enrichment to students academics and other professionals interested in science in all its forms who seek to deepen the role that language plays in its structure and dynamics

Philosophy of Psychology: Causality and Psychological Subject Wenceslao J. Gonzalez, 2018-06-11 Contemporary philosophy of science analyzes psychology as a science with special features because this discipline includes some specific philosophical problems descriptive and normative structural and dynamic Some of these are particularly relevant both theoretically causal explanation and practically the configuration of the psychological subject and its relations with psychiatry Two central aspects in this book are the role of causality especially conceived as intervention or manipulation and the characterization of the psychological subject This requires a clarification of scientific explanations in terms of causality in psychology because characterizations of causality are quite different in epistemological and ontological terms One of the most influential views is James Woodward's approach to causality as intervention which entails an analysis of its characteristics new elements and limits This means taking into account the structural and dynamic aspects included in causal cognition and psychological explanations Psychology seen as special science also requires us to consider the scientific status of psychology and the psychological subject which leads to limits of naturalism in psychology Fixing Language Herman Cappelen, 2018 Herman Cappelen investigates how language and other representational devices can go wrong and how to fix them We use language to understand and talk about the world but what if our language has deficiencies that prevent it from playing that role How can we revise our concepts and what are the limits on revision

Unveiling the Magic of Words: A Overview of "**The Philosophy Of Pf Strawson Library Of Living Philosophers**"

In a global defined by information and interconnectivity, the enchanting power of words has acquired unparalleled significance. Their power to kindle emotions, provoke contemplation, and ignite transformative change is actually awe-inspiring. Enter the realm of "**The Philosophy Of Pf Strawson Library Of Living Philosophers**," a mesmerizing literary masterpiece penned by way of a distinguished author, guiding readers on a profound journey to unravel the secrets and potential hidden within every word. In this critique, we shall delve into the book is central themes, examine its distinctive writing style, and assess its profound impact on the souls of its readers.
