Uhthoff,2012-12-06 Physicians have always known though often they are reluctant to admit it that the quality of their daily practice depends on the results of research Irvine H Page The 1985 Applied Basic Science Course distinguished itself for three important reasons First it showed clearly the extent to which biotechnology and biomechanics have become an integral part of orthopedics Second it emphasized the increasingly important role the orthopedist will have to play in the treatment of the aging population Projected Canadian statistics estimate that the population aged 65 years and older will increase from the current 9.7% to 13% by the year 2000 Based on the current total population of almost 25 million the number of hip fractures caused by age related bone loss will almost double and will reach approximately 28 000 per year in Canada Extrapolation of these figures according to populations in other countries is easy The costs in expenditures and human suffering are inestimable This is an area where orthopedic research will have to redouble its efforts in the hope of finding better preventive measures Furthermore knowledge of the pathogenetic mechanisms of bone loss becomes increasingly important in osteoporosis associated with weightlessness The third impressive insight we derived from the presentations at this symposium was the revelations of the latest imaging techniques and monitoring devices Nuclear medicine computer

assisted tomography and nuclear magnetic resonance are being applied to bone disease      **Brunner & Suddarth's Canadian Textbook of Medical-Surgical Nursing** Mohamed El Hussein, Joseph Osuji, 2019-09-23 Brunner and Suddarth's Canadian Textbook of Medical Surgical Nursing is a student friendly text with an easy to read and comprehend Nursing Care Plan focus and a distinct Canadian focus      *Operative Otolaryngology: Head and Neck Surgery E-Book* Eugene N.
