Smoking Policy

Robert L. Rabin, Stephen D. Sugarman, 1993 Public and governmental attitudes toward tobacco use are dramatically different today when compared to the attitudes of the mid 1960s Smoking then was widely regarded as a mark of sophistication and a natural companion at work and play The accumulating evidence on the serious health risks of smoking to both smokers and nonsmokers has changed those sentiments Now tobacco use is increasingly a target of cultural disapproval both in social circles and in the regulatory arena Smoking Policy Law Politics and Culture examines the interplay between public opinion and governmental action as norms have changed about whether one should smoke and where it is appropriate to do so In this study an interdisciplinary team from law public health communications political science and sociology addresses a wide range of tobacco control issues Topics covered include the politics of smoking control lawsuits by smokers against the tobacco industry the strategies of employers and insurers in discouraging smoking lessons from drug and alcohol control the conversion of smoking from a health issue into a moral issue the enforcement of no smoking rules and the impact of tobacco advertising controls This volume provides a comprehensive exploration of both institutional and informal mechanisms regulating tobacco use in late twentieth century America The contributors assess the roles played by public officials corporations and insurers the scientific public health and medical communities and opinion leaders Smoking Policy is essential reading for policymakers and advocates professionals in law public health and social science fields corporate officials and those generally interested in issues of smoking and public health

The Cigarette Sarah Milov, 2019-10-02 Los Angeles Times Book Prize Finalist Winner of the Willie Lee Rose Prize Winner of the PROSE Award in United States History Hagley Prize in Business History Finalist A Smithsonian Best History Book of the Year Vaping gets all the attention now but Milov's thorough study reminds us that smoking has always intersected with the government for better or worse New York Times Book Review From Jamestown to the Marlboro Man tobacco has powered America's economy and shaped some of its most enduring myths The story of tobacco's rise and fall may seem simple enough a tale of science triumphing over corporate greed but the truth is more complicated After the Great Depression government officials and tobacco farmers worked hand in hand to ensure that regulation was used to promote tobacco rather than protect consumers As evidence of the connection between cigarettes and cancer grew scientists struggled to secure federal regulation in the name of public health What turned the tide Sarah Milov reveals was a new kind of politics a movement for nonsmokers rights Activists took to the courts the streets city councils and boardrooms to argue for smoke free workplaces and allied with scientists to lobby elected officials The Cigarette puts politics back at the heart of tobacco's rise and fall dramatizing the battles over corporate influence individual choice government regulation and science A nuanced and ultimately devastating indictment of government complicity with the worst excesses of American capitalism New Republic An impressive work of scholarship

evincing years of spadework A well told story Wall Street Journal If you want to know what the smoke filled rooms of midcentury America were really like this is the book to read Los Angeles Review of Books *Smoke Ring* Peter Taylor,1984

Steel,2014-04-21 Recent partisan squabbles over science in the news are indicative of a larger tendency for scientific research and practice to get entangled in major ideological divisions in the public arena This politicization of science is deepened by the key role government funding plays in scientific research and development the market leading position of U S based science and technology firms and controversial U S exports such as genetically modified foods or hormone injected livestock This groundbreaking one volume A to Z reference features 120 150 entries that explore the nexus of politics and science both in the United States and in U S interactions with other nations The essays each by experts in their fields examine Health environmental and social cultural issues relating to science and politics Concerns relating to government regulation and its impact on the practice of science Key historical and contemporary events that have shaped our contemporary view of how science and politics intersect Science and Politics An A to Z Guide to Issues and Controversies is a must have resource for researchers and students who seek to deepen their understanding of the connection between science and politics **The Politics of Tobacco** Melvyn Read,1996 This work aims to offer a critical examination of the literature on policy networks and on policy communities and to show a model for understanding the relationship between industry and government It then uses the model to demonstrate issue network and producer network effectiveness **The Political Reconstruction of American Tobacco, 1862-1933** Patrick Mulford O'Connor,2025-06-03 A deeply researched and clearly argued account of the mutual growth of the federal government and the modern tobacco Nearly everything about the United States tobacco economy changed in the generation following the American Civil War From labor to consumption

manufacturing to regulation tobacco was utterly reconstructed comparatively a new industry as one contemporary wrote The Political Reconstruction of American Tobacco 1862 1933 exposes the causes of these changes and in the process it reconsiders cornerstones of the American national narrative Through a detailed rendering of tobacco s late nineteenth century political economy this book argues that the federal state s and American capitalism s development were mutually constitutive and fundamentally political processes From the Civil War to the Progressive Era diverse political movements across tobacco s commodity chain drove state and market development creating the immense power and stifling poverty that defined tobacco s reconstruction The Political Reconstruction of American Tobacco 1862 1933 emphasizes the significance of the thousands of manufacturers whose interest groups shaped federal tax policy and in turn forged a powerful and effective internal revenue system the increasingly influential fertilizer producers and warehouse operators who determined tobacco s value and the crop scientists who sought to promote and rationalize US tobacco production As these actors reshaped tobacco s commodity chain they missed and even dismissed the interests of tobacco growers especially newly emancipated African Americans and smallholding whites throughout the South The ruling logic of tobacco s reconstructed political economy rationalized agrarian indebtedness justified low prices and intensified labor discipline on thousands of small farms In emphasizing these exclusions The Political Reconstruction of American Tobacco 1862 1933 reveals how nineteenth century state and economic development coincided with and even created rural poverty The Logic of American Politics Samuel Kernell, Gary C. Jacobson, Thad Kousser, Lynn Vavreck, Timothy R. Johnson, 2023-06-24 Why does the American political system work the way it does After observing the strains of intense partisanship and divided government many Americans are wondering what logic if any can be found in politics With both sides of the political spectrum being so different from one another and the scales often tipping in the favor of the opposing party by a fraction of a percentage point how can anyone work the system to their advantage With fresh analysis of the 2022 midterm election results the Eleventh Edition of bestselling textbook The Logic of American Politics provides students with the tools they need to make sense of our government today Weaving together historical context contemporary politics and a toolkit of institutional design concepts the authors build an understanding of political institutions and practices as imperfect solutions to collective action problems
