*Audacity to Teach!* Jacob Easley II, 2012-07-10 The Audacity to Teach is developed from a study of an inner city urban elementary school that has undergone serial comprehensive reforms Each act of reform has promised to bring about certain changes that would will in return improve this particular school This book explores critical issues such as 1 the language of student achievement and accountability 2 the politics and policies that inform the processes of schooling and school reform and 3 the role of leadership in schools including teacher leadership Each of these evolves from a serious examination of capacity as the dynamic nexus between teaching innovations and student learning This book is intended for teachers school administrators policy makers and academics who are interested in understanding school improvement and effectiveness it provides commonsense recommendations for the future direction of American education that aim to promote student success

**Education and the City** Gerald Grace, 2013-06-17 City schools especially those attended by working class and ethnic minority pupils are the catalysts of many significant issues in educational debate and policy making They bring into sharp focus questions to do with class gender and race relations in education concepts of equality of opportunity and of social justice and controversies about the wider political economic and social context of mass schooling America Western Europe and Australia have all taken a keen interest in the problems of urban schooling The contributors to this collection of original essays all share a concern about these problems although they approach them from a wide range of theoretical and ideological positions Gerald Grace and his contributors criticise the current limitations of urban education as a field of study and they present a foundation for a more historically located and critically informed inquiry into problems conflicts and contradictions in urban schooling Part I presents contributions on theories of the urban Part II focuses upon the history of urban education both in Britain and the USA Part III discusses contemporary policy and practice with essays relating to education in inner city London and in New York City This book was first published in 1984 **Wisconsin Library Bulletin**, 1963 *Anti-Blackness and Public Schools in the Border South* Claude Weathersby, Matthew D. Davis, 2019-09-01 This new book on Black public schooling in St Louis is the first to fully explore deep racialized antagonisms in St Louis Missouri It accomplishes this by addressing the white supremacist context and anti Black policies that resulted In addition this work attends directly to community agitation and protest against racist school policies The book begins with post Civil War schooling of Black children to the important Liddell case that declared unconstitutional the St Louis Public Schools The judicial wrangling in the Liddell case its aftermath and community reaction against it awaits a next book by the authors of *Anti blackness and public schools*

**School Reform, Corporate Style** Dorothy Shipps, 2006 Like other big city school systems Chicago's has been repeatedly reformed over the last century Yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipps reappraises the tumultuous history of educational progress in Chicago revealing that the persistent

lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipp's chronicles how Chicago's corporate actors led abetted or restrained nearly every attempt to transform the city's school system then asks whether schools might be better reformed by others To show why city schools have failed urban children so badly she traces Chicago's reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880-1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipp's concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipp's makes a strong case that it's high time to look elsewhere perhaps to educators themselves for new leadership
