that surround the small business and its place in society. In particular, the complex nature of its social role is examined. On the one hand, the entrepreneur can be seen as the innovator exploiting free market capitalism to strengthen the economy; on the other, employment conditions and industrial relations are said to suffer. Moreover, the growing importance of green issues now brings into question the extent to which the small firm benefits the environment. This book will be of interest to students of business and sociology.

Labour Market Adjustments in Europe Julian Messina, Claudio Michelacci, Jarkko Turunen, Gylfi Zoega, 2006-01-01. The book is an interesting contribution to the literature on labour market practices in Europe. The important statistics and analysis conducted by the authors in the book have important implications for scholars in the international entrepreneurship field wanting to know more about the diverse labour practices in Europe. Vanessa Ratten, *Journal of International Entrepreneurship*. It is now widely accepted that expansionary fiscal or monetary policies alone are unlikely to help Europe's ailing economies. Solving Europe's economic problems requires reform of the economic institutions that influence economic activity and the way the economy responds to macroeconomic shocks. This volume employs novel approaches to the study of some of these institutions. The group of contributors in this book come from academia and international organizations in Europe and the USA. They focus on trade unions which affect real wage flexibility and the provision of training to workers. They also concentrate on employment protection legislation which discourages firms from firing old workers and also from hiring new ones. The structure of housing market imperfections that can greatly affect regional mobility is also discussed. Labour economists and scholars of European studies as well as economic policymakers will read *Labour Market Adjustments in Europe* with great interest.

The Dynamics of Asian Labour Markets John Benson, Ying Zhu, 2011-03-02. Asia has undergone rapid economic transformation over the past two decades. Despite its constant economic growth, the 1997-98 Asian financial crisis and the resulting surge in unemployment highlighted the vulnerability of national systems that base development solely on economic growth. This book fills a major research gap by exploring the nature, dynamics and functioning of Asian labour markets in eight major Asian economies including Japan, South Korea, Hong Kong, Singapore, China, Vietnam, India and Malaysia. It examines the type of labour markets that exist in Asia, how they have responded to globalisation and how flexible they are to changing social and economic conditions. The book analyses how the current transformation has impacted on the key parties such as employers, employees, trade unions, governments, organisations and society as a whole and considers the likely future trends and developments in Asian labour markets.
