

Great consult experience with Jon Roz. He took the time to understand specifically what I was concerned about, thoroughly reviewed the state of the basement and proposed a solution that addressed the issue. There was no hard sell of things I don't need - only helpful suggestions. Great experience thus far with Adirondack Basement Systems

Small Things Considered Henry Petroski, 2007-12-18 Why has the durable paper shopping bag been largely replaced by its flimsy plastic counterpart What circuitous chain of improvements led to such innovations as the automobile cup holder and the swiveling vegetable peeler With the same relentless curiosity and lucid witty prose he brought to his earlier books Henry Petroski looks at some of our most familiar objects and reveals that they are in fact works in progress For there can never be an end to the quest for the perfect design To illustrate his thesis Petroski tells the story of the paper drinking cup which owes its popularity to the discovery that water glasses could carry germs He pays tribute to the little plastic tripod that keeps pizza from sticking to the box and analyzes the numerical layouts of telephones and handheld calculators *Small Things Considered* is Petroski at his most trenchant and provocative casting his eye not only on everyday artifacts but on their users as well

The Road Taken Henry Petroski, 2017-02-21 A renowned historian and engineer explores the past present and future of America's crumbling infrastructure. Acclaimed engineer and historian Henry Petroski explores our core infrastructure from both historical and contemporary perspectives explaining how essential their maintenance is to America's economic health. Petroski reveals the genesis of the many parts of America's highway system: our interstate numbering system, the centerline that divides roads, and such taken-for-granted objects as guardrails, stop signs, and traffic lights, all crucial to our national and local infrastructure. A compelling work of history, *The Road Taken* is also an urgent clarion call aimed at American citizens, politicians, and anyone with a vested interest in our economic well-being. Physical infrastructure in the United States is crumbling, and Petroski reveals the complex and challenging interplay between government and industry inherent in major infrastructure improvement. The road we take in the next decade toward rebuilding our aging infrastructure will in large part determine our future national prosperity.

The House with Sixteen Handmade Doors: A Tale of Architectural Choice and Craftsmanship Henry Petroski, 2014-05-05 An architectural whodunit that unlocks the secrets of a hand-built home. When Henry Petroski and his wife Catherine bought a charming but modest six-decades-old island retreat in coastal Maine, Petroski couldn't help but admire its unusual construction. An eminent expert on engineering history and design, he began wondering about the place's origins and evolution. Who built it, and how? What needs, materials, technologies, historical developments, and laws shaped it? How had it fared through the years with its various inhabitants? Sleuthing around dimly lit closets, knotty pine wall panels, and even a secret passage but never removing so much as a nail, Petroski zooms in on the details but also steps back to examine the structure in the context of its time and place. Catherine Petroski's beautiful photographs capture the clues and the atmosphere. A vibrant cast of neighbors and past residents, most notably the house's masterful creator, an engineer-turned-folk architect, become key characters in the story. As the mystery unfolds, revealing an extraordinary house and its environs, this ode to loving design will leave readers enchanted and inspired.

An Engineer's Alphabet Henry Petroski, 2011-10-10 Written by America's most famous engineering storyteller and educator, this abecedarium is one engineer's selection of thoughts, quotations, anecdotes, facts, trivia, and arcana relating to the practice, history, culture, and traditions of his profession. The entries reflect decades of reading, writing, talking, and thinking about engineers and engineering and range from brief essays to lists of great engineering achievements. This work is organized alphabetically and more like a dictionary than an encyclopedia. It is not intended to be read from first page to last but rather to be dipped into here and there as the mood strikes the reader. In time, it is hoped, this book should become the source to which readers go first when they encounter a vague or obscure reference to the softer side of engineering.

The Toothpick Henry Petroski, 2008-11-04 A celebration of culture and technology as seen through the history of the humble yet ubiquitous toothpick. From the best-selling author of *The Pencil*, from ancient Rome where emperor Nero made his entrance into a banquet hall

with a silver toothpick in his mouth to nineteenth century Boston where Charles Forster the father of the American wooden toothpick industry ensured toothpicks appeared in every restaurant the toothpick has been an omnipresent yet often overlooked part of our daily lives Here with an engineer s eye for detail and a poet s flair for language Henry Petroski takes us on an incredible tour of this most interesting invention Along the way he peers inside today s surprisingly secretive toothpick manufacturing industry and explores a treasure trove of the toothpick s unintended uses and perils from sandwiches to martinis and beyond *The Essential Engineer* Henry Petroski,2011-03-08 From the acclaimed author of *The Pencil* and *To Engineer Is Human* *The Essential Engineer* is an eye opening exploration of the ways in which science and engineering must work together to address our world s most pressing issues from dealing with climate change and the prevention of natural disasters to the development of efficient automobiles and the search for renewable energy sources While the scientist may identify problems it falls to the engineer to solve them It is the inherent practicality of engineering which takes into account structural economic environmental and other factors that science often does not consider that makes engineering vital to answering our most urgent concerns Henry Petroski takes us inside the research development and debates surrounding the most critical challenges of our time exploring the feasibility of biofuels the progress of battery operated cars and the question of nuclear power He gives us an in depth investigation of the various options for renewable energy among them solar wind tidal and ethanol explaining the benefits and risks of each Will windmills soon populate our landscape the way they did in previous centuries Will synthetic trees said to be more efficient at absorbing harmful carbon dioxide than real trees soon dot our prairies Will we construct a sunshade in outer space to protect ourselves from dangerous rays In many cases the technology already exists What s needed is not so much invention as engineering Just as the great achievements of centuries past the steamship the airplane the moon landing once seemed beyond reach the solutions to the twenty first century s problems await only a similar coordination of science and engineering Eloquently reasoned and written *The Essential Engineer* identifies and illuminates these problems and above all sets out a course for putting ideas into action

Pushing the Limits Henry Petroski,2005-09-13 Here are two dozen tales in the grand adventure of engineering from the Henry Petroski who has been called America s poet laureate of technology *Pushing the Limits* celebrates some of the largest things we have created bridges dams buildings and provides a startling new vision of engineering s past its present and its future Along the way it highlights our greatest successes like London s Tower Bridge our most ambitious projects like China s Three Gorges Dam our most embarrassing moments like the wobbly Millennium Bridge in London and our greatest failures like the collapse of the twin towers on September 11 Throughout Petroski provides fascinating and provocative insights into the world of technology with his trademark erudition and enthusiasm for the subject
