**Making Sense of Our Senses Gr. K-1** , *Engaging Jesus with Our Senses* Jeannine Marie Hanger, 2024-08-27 Jesus took on flesh he was embodied And the Gospels use multisensory language to reveal that his teaching ministry and interactions with people engaged the senses Consider the raging storm on the Sea of Galilee the perfume filling the house as Mary anointed Jesus s feet the significance of touch as Jesus healed people Jesus even described himself in sensory terms as the bread of life the light of the world the vine to whom his disciples are connected Our physical senses are crucial to gaining knowledge of the world around us Yet when it comes to Bible reading we often reduce it to a mere cognitive experience ignoring the Psalmist s invitation to taste and see that the Lord is good This book offers a fresh way to read the Gospels with an emphasis on embodiment focused on a life abiding in Christ The goal is a greater more tangible knowledge of God Jeannine Hanger points to the importance of engaging our physical senses in Bible reading shows an approach to doing so with an emphasis on sparking the imagination and looks at how utilizing our primary senses plays out in reading the Gospels Each chapter includes sensory practices and questions for personal reflection The book includes a foreword by Grant Macaskill Senses and Your Abilities Ed Hardy, Sean Hardy, 2008-03 There are many books on the market for the exercise of the body and quite a few on mental exercises This book offers the first everyday exploration on sensory training With trained senses new worlds open up to the reader Colors become brighter Sounds become sweeter Different tastes form on

*Exiled From Our Bodies* Tereza Stehlíková,2025-09-30 In an era where digital devices increasingly mediate our perception of reality this book explores the tension between the richness of direct sensory experience and the allure of the screen It examines how our growing dependence on virtual spaces and visually dominant media has led to a disconnect from our bodies and environment contributing to a sense of alienation both personal and ecological Drawing on an autoethnographic approach artistic research methods and ethnographic interviews with experts across numerous disciplines this book argues for the continuing importance of lived embodied multi sensory experience It considers how the arts rather than merely reinforcing technological mediation can actively subvert the passivity imposed on our subjectivity by the latter offering creative strategies to re engage with the world through all our senses By using artistic processes to navigate the tension between the virtual and the real the book explores how creative practices can generate new ways of seeing feeling and understanding At its core this work suggests that to even begin to address the current environmental crisis we must first return to our bodies and come back to our senses literally and figuratively Through artistic experimentation philosophical inquiry and sensory exploration it proposes a reawakening to the reciprocity between body technology and environment offering a pathway towards a more conscious engaged and aesthetical way of inhabiting the world
