The Canals Building America:

Building the Panama Canal Russell Roberts, 2020-02-04 The building of the Panama Canal was one of the great engineering feats of the twentieth century For hundreds of years mankind had dreamed about cutting through the Isthmus of Panama to build a canal but the jungle insects and the damp humid conditions had always combined to defeat any and all attempts to construct the waterway It took the discovery of the mosquito as a disease carrier the tenacity of the workmen and the single minded stubbornness of Theodore Roosevelt to make the canal dream a reality But if the canal made some men great it also destroyed the lives of others That was the sad fate of Count Ferdinand de Lesseps of France a national hero who had done the impossible by building the Suez Canal then failed in Panama The fate of de Lesseps is as much the story of the Panama Canal as is the success of Roosevelt
