Communication and Group Decision Making Randy Y. Hirokawa, Marshall Scott Poole, 1996-07-09 Despite the importance of group communication processes they remain elusive and difficult to understand and the type of theory necessary to make sense of these processes differs from those commonly found in the social sciences This collection of essays advances a unique perspective on group decision making which is complementary to approaches taken in management psychology and sociology As the new edition of this book demonstrates a number of strong theoretical frameworks have developed over the past 15 years together with considerable empirical evidence The essays are distinctive both in their explicit focus on communication processes and in their location in a unique intellectual tradition As such the book serves

New Directions in Group Communication Lawrence R. Frey, 2002 New Directions in Group Communication takes as

its mission the setting of the agenda for the study of group communication in the future It does so by presenting work that scholars have not previously explored in the current small group communication literature Part I focuses on new theoretical and conceptual directions both presenting new views and extending current positions Part II examines new research methodologies while Part III looks at antecedent factors affecting group communication Parts IV and V of the text provide insight into both group communication process and practices Part VI covers different group communication contexts including communication patterns in top management teams

The Handbook of Group Communication Theory and Research Lawrence R. Frey, Dennis Gouran, Marshall Scott Poole, 1999-07-08 The Handbook of Group Communication Theory and Research establishes a central resource for the field documenting and synthesizing the work done in group communication s 50 year history With contributions from the most experienced and respected scholars in the field the editors Lawrence R Frey Dennis S Gouran and Marshall Scott Poole present an overview of group communication study and examine a variety of theoretical positions and methodological practices The volume is divided into six broad areas of communication scholarship Foundations of group communication theory and research Individuals and group communication Task and relational group communication Group communication processes Group communication facilitation Group communication contexts and applications The sections serve as a crossroads where various paths pursued in each area meet summarize and suggest new maps and roads that need to be followed in the future Offering a comprehensive history of group communication theory and research and establishing new conceptual perspectives and research agendas for future group communication scholars this important resource will be an unrivalled tool for scholars researchers educators practitioners and students alike

theory and research to successful learning practice

Financing Micro Health Insurance: Theory, Methods And

Evidence David M Dror, 2018-12-27 Healthcare for all at affordable prices is still a major but universally elusive goal. Everyone spends money on healthcare and it is the most impoverishing consumption item. Thus most governments and the United Nations promote Universal Health Coverage each country's unique blend of tools for healthcare financing including taxes, subsidies, and market controls. Most people in low and middle income countries (LMICs) have no health insurance of any kind. And most LMIC governments lack the political will, information, or resources to require their citizens to buy health insurance themselves or to subsidize insurance for all who cannot afford the price. This book deals with financing voluntary and contributory health insurance for resource-poor and rural groups in LMICs. This book addresses three issues. The first is how to catalyze demand for health insurance and develop insurance literacy among the largely illiterate and innumerate target population using training programs to build an enabling consensus allowing locals to create and administer such schemes. The second involves the process of developing simplified methods for risk assessment which can help to underwrite risks, price the micro health insurance schemes, and ensure proper implementation. The third issue is formulating a compelling business case which would make this health insurance affordable, financially sustainable, and operationally scalable. This book develops insurance education and financial literacy for students of economics, business administration, insurance development studies, and social work to prepare them for practical work as implementers, policymakers, or evaluators. A supplementary section for teachers and students includes comprehension questions.

Visual Displays in Qualitative and Mixed Method Research Elizabeth G. Creamer, 2024-07-02 This boundary-spanning textbook explores diverse ways that visual display can advance understanding of complex social phenomena in applied fields in the social and human sciences. It provides a window into the latest advances in mixed methods research (MMR) by investigating how integrative tables and figures have been creatively adapted in diverse contemporary contexts where qualitative methods are prominent. The book affirms that the usefulness of visual displays is not restricted to reporting; it extends to helping investigators conceptualize a research problem, embed quality in research design, during planning, advance multi-dimensional sampling, to extend analysis, and as a tool to highlight integration during reporting. Chapters feature examples that demonstrate how different shapes and textual devices that are available through basic word processing software can help an investigator to think more complexly about the multi-dimensionality or temporality of a construct, process, or phenomenon. Tailored for emerging scholars, this comprehensive resource book will prove useful in seminars and workshops designed to assist students in writing a research proposal. It is an invaluable textbook for a new generation of hybrid research methods courses that combine qualitative and mixed methods in the social sciences, education, and healthcare.

Mapping Equity and Quality in Mathematics Education Bill Atweh, Mellony Graven, Walter Secada, Paola Valero, 2011-01-06 Concerns about quality mathematics education are often posed in terms of the types of mathematics that are worthwhile and valuable for both the

student and society in general and about how to best support students so that they can develop this mathematics Concerns about equity are about who is excluded from the opportunity to develop quality mathematics within our current practices and systems and about how to remove social barriers that systematically disadvantage those students This collection of chapters summarises our learning about the achievement of both equity and quality agendas in mathematics education and to move forward the debate on their importance for the field **Encyclopedia of Communication Theory** Stephen W.

Littlejohn, Karen A. Foss, 2009-08-18 With more than 300 entries these two volumes provide a one stop source for a comprehensive overview of communication theory offering current descriptions of theories as well as the background issues and concepts that comprise these theories This is the first resource to summarize in one place the diversity of theory in the communication field Key Themes Applications and Contexts Critical Orientations Cultural Orientations Cybernetic and Systems Orientations Feminist Orientations Group and Organizational Concepts Information Media and Communication Technology International and Global Concepts Interpersonal Concepts Non Western Orientations Paradigms Traditions and Schools Philosophical Orientations Psycho Cognitive Orientations Rhetorical Orientations Semiotic Linguistic and Discursive Orientations Social Interactional Orientations Theory Metatheory Methodology and Inquiry **Methods of Rhetorical Criticism** Bernard L. Brock, Robert Lee Scott, James W. Chesebro, 1989
