Brethren of the Net Willis Conner Sorensen,1995 Draws together information from diverse sources to illuminate an important chapter in the history of American science Sorensen asks how it came about that within the span of forty years the American entomological community developed from a few gentlemen naturalists with primary links to Europe to a thriving scientific community exercising world leadership in entomological science He investigates the relationship between American and European entomology the background of American entomologists the implications of entomological theory and the specific links between 19th century American society and the rapid institutional growth and advances in theoretical and applied entomology By the 1880s the entomologists constituted the largest single group of American zoologists and the largest group of ecologists in the world While rooted in the British natural history tradition these individuals developed a distinctive American style of entomological investigation Inspired by the concept of the balance of nature they excelled in field investigations of North American insects with special emphasis on insect pests that threatened crop production in a market oriented agriculture During this period entomologists described over ten times as many North American insect species as had been previously named and they consolidated their findings in definitive collections Employing evolutionary theory they contributed to the growing understanding of insect migration mimicry seasonal dimorphism and the symbiotic relationship of plant and animal species Americans also led in the revision of insect taxonomy according to the new principles Their employment of entomological findings in the practical control of agricultural pests set new standards worldwide Initially ridiculed as eccentric bug hunters American entomologists eventually achieved stature as agricultural advisers and as investigators into the origin and nature of life Based primarily on the correspondence of American entomologists Brethren of the Net draws together information from diverse sources to illuminate an important chapter in the history of American science

Black Culture, Inc. Patricia A. Banks,2022-04-19 A surprising and fascinating look at how Black culture has been leveraged by corporate America Open the brochure for the Alvin Ailey American Dance Theater and you ll see logos for corporations like American Express Visit the website for the Apollo Theater and you ll notice acknowledgments to corporations like Coca Cola and Citibank The Martin Luther King Jr Memorial and the National Museum of African American History and Culture owe their very existence to large corporate donations from companies like General

Motors And while we can easily make sense of the need for such funding to keep cultural spaces afloat less obvious are the reasons that corporations give to them In *Black Culture Inc* Patricia A Banks interrogates the notion that such giving is completely altruistic and argues for a deeper understanding of the hidden transactions being conducted that render corporate America dependent on Black culture Drawing on a range of sources such as public relations and advertising texts on corporate cultural patronage and observations at sponsored cultural events Banks argues that Black cultural patronage profits firms by signaling that they value diversity equity and inclusion By functioning in this manner support of Black cultural initiatives affords these companies something called diversity capital an increasingly valuable commodity in today's business landscape While this does not necessarily detract from the social good that cultural patronage does it reveals its secret cost ethnic community support may serve to obscure an otherwise poor track record with social justice Banks deftly weaves innovative theory with detailed observations and a discerning critical gaze at the various agendas infiltrating memorials museums and music festivals meant to celebrate Black culture At a time when accusations of discriminatory practices are met with immediate legal and social condemnation the insights offered here are urgent and necessary
