of the market theory Hasse Ekstedt and Angelo Fusari analyse the concept of growth and uncertainty with respect to a more realistic modelling of man The book also addresses central political problems and their potential solutions including permanent unemployment distribution of income the interaction of real and financial growth money and the credit system In seeking objective values to help to obtain a socially sustainable society the book traces a tentative revision of economic and social thought based on a deepening of some crucial features of modern economies and societies These features include innovation the connected flows of uncertainty entrepreneurship and their role in fuelling and characterizing economic growth and development This book will be of interest to postgraduate students and researchers of Economics particularly to those focussing on Economic Theory and Political Economy
