Harding, 2000-05-18 The Bronze Age roughly 2500 to 750 BC was the last fully prehistoric period in Europe and a crucial element in the formation of the Europe that emerged into history in the later first millennium BC This book focuses on the material culture remains of the period and through them provides an interpretation of the main trends in human development that occurred during this timespan It pays particular attention to the discoveries and theoretical advances of the last twenty years that have necessitated a major revision of received opinions about many aspects of the Bronze Age Arranged thematically it reviews the evidence for a range of topics in cross cultural fashion defining which major characteristics of the period were universal and which culture and area specific The result is a comprehensive study that will be of value to specialists and students while remaining accessible to the non specialist

The Bronze Age in Barbarian Europe Jacques Briard, 1979 For a long period any art or cultural feature alien to the Hellenic or Roman world was held in contempt and the epithet barbarian thus acquired a pejorative meaning The first reactions against this view appeared in the nineteenth century when scholars began to acknowledge the existence of ancient civilizations which had had no writing The present study shows the way of life of those Europeans living in the Metal Ages describing their social and religious customs and setting out to understand through the material objects they have left us the way their minds worked and their beliefs evolved Professor Briard describes the most typical groups delineating in particular scenes of everyday life using the results gleaned from the most striking excavations and extant monuments
