Giant Metallic Deposits Peter Laznicka, 2006-06-18 This is the first comprehensive book on the geological characteristics of giant metallic deposits that provides solid facts rather than rapidly changing theories The book provides abundant material for comparative research in metallogeny practical information for the explorationists as to where to look for the elephants and inspiration for commodity investors 21st Century Political Science: A Reference Handbook John T Ishiyama, Marijke Breuning, 2011 Offering full coverage of major subthemes and subfields within political science this reference handbook includes entries on topics from theory and methodology to international relations and institutions

The Evidence and Impact of Financial Globalization Gerard Caprio, 2012-11-27 The sharp realities of financial globalization become clear during crises when winners and losers emerge Crises usher in short and long term changes to the status quo and everyone agrees that learning from crises is a top priority The Evidence and Impact of Financial Globalization devotes separate articles to specific crises the conditions that cause them and the longstanding arrangements devised to address them While other books and journal articles treat these subjects in isolation this volume presents a wide ranging consistent yet varied specificity Substantial authoritative and useful these articles provide material unavailable elsewhere Substantial articles by top scholars sets this volume apart from other information sources Rapidly developing subjects will interest readers well into the future Reader demand and lack of competitors underline the high value of these reference works

Handbook of Public Economics Alan J. Auerbach, Raj Chetty, Martin Feldstein, Emmanuel Saez, 2013-06-24 In the Handbook of Public Economics vol 5 top scholars provide context and order to new research about mechanisms that underlie both public finance theories and applications These fundamental subjects follow the recent steady movement away from rational decision making and toward more personalized approaches to tax generation and expenditure especially in terms of the use of psychological methods and financial incentives Closely scrutinized subjects include new research in empirical instead of theoretical public finance the methods for measuring taxes both in revenue generation and expenditure and the roles that taxes play in specific settings such as emerging economies urban settings charitable giving and among political entities cities counties states countries Contributors look at both the tax and expenditure sides of public finance emphasizing recent influences that psychology and philosophy have exerted in economics with articles on behavioral finance charitable giving and dynamic taxation To a field enjoying rapid growth their articles bring context and order illuminating the mechanisms that underlie both public finance theories and applications Editor Raj Chetty is the recipient of the 2013 John Bates Clark Medal from the American Economic Association Focuses on new approaches to both revenue generation and expenditures in public finance Presents coherent summaries of subjects in public economics that stretch from methodologies to applications Makes details about public economics accessible to scholars in fields outside economics *Asian*

Atmospheric Pollution Ramesh P. Singh, 2021-08-31 Asian Atmospheric Pollution Sources Characteristics and Impacts

provides a concise yet comprehensive treatment of all aspects of pollution and air quality monitoring across all of Asia. It focuses on key regions of the world and details a variety of sources, their transport mechanism, long term variability and impacts on climate at local and regional scales. It also discusses the feedback on pollutants on different meteorological parameters like radiative forcing, fog formations, precipitation, cloud characteristics and more. Drawing upon the expertise of multiple well known authors from different countries to underline some of these key issues, it includes sections dedicated to treatment of pollutant sources, studying of pollutants and trace gases using satellite, station based observations and models, transport mechanisms, seasonal and inter annual variability and impact on climate, health and biosphere in general. Asian Atmospheric Pollution: Sources, Characteristics and Impacts is a useful resource for scientists and students to understand the sources and dynamics of atmospheric pollution as well as their transport from one continent to other continents, helping the atmospheric modelling community to model different scenarios of the pollution, gauge its short term and long term impacts across regional to global scales and better understand the ramifications of episodic events. Covers all of Asia in detail in terms of pollution. Focuses not only on local pollution but on long term transport of these pollutants and their impacts on other regions as well as the globe. Includes discussion of both particulate matter and greenhouse gases. Serves as a single resource on Asian air pollution and Impacts from the most current research across the globe including the US, Asia, Africa and Europe.

Stream Hydrology Nancy D. Gordon, Thomas A. McMahon, Brian L. Finlayson, Christopher J. Gippel, Rory J. Nathan, 2013-05-03. Since the publication of the first edition in 1994, there have been rapid developments in the application of hydrology, geomorphology and ecology to stream management. In particular, growth has occurred in the areas of stream rehabilitation and the evaluation of environmental flow needs. The concept of stream health has been adopted as a way of assessing stream resources and setting management goals. *Stream Hydrology: An Introduction for Ecologists*, Second Edition, documents recent research and practice in these areas. Chapters provide information on sampling, field techniques, stream analysis, the hydrodynamics of moving water, channel form, sediment transport and commonly used statistical methods such as flow duration and flood frequency analysis. Methods are presented from engineering hydrology, fluvial geomorphology and hydraulics with examples of their biological implications. This book demonstrates how these fields are linked and utilised in modern scientific river management. Emphasis on applications from collecting and analysing field measurements to using data and tools in stream management. Updated to include new sections on environmental flows, rehabilitation, measuring stream health and stream classification. Critical reviews of the successes and failures of implementation. Revised and updated windows based AQUAPAK software. This book is essential reading for 2nd/3rd year undergraduates and postgraduates of hydrology, stream ecology and fisheries science in Departments of Physical Geography, Biology, Environmental Science, Landscape Ecology, Environmental Engineering and Limnology. It would be valuable reading for professionals working in stream ecology, fisheries science and habitat management, environmental consultants and engineers.

Strategies for Lead-Source Attribution at Superfund Sites Associated with Mining Activities National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Sources of Lead Contamination at or near Superfund Sites, 2017-10-31 The Superfund program of the US Environmental Protection Agency EPA was created in the 1980s to address human health and environmental risks posed by abandoned or uncontrolled hazardous waste sites Identification of Superfund sites and their remediation is an expensive multistep process As part of this process EPA attempts to identify parties that are responsible for the contamination and thus financially responsible for remediation Identification of potentially responsible parties is complicated because Superfund sites can have a long history of use and involve contaminants that can have many sources Such is often the case for mining sites that involve metal contamination metals occur naturally in the environment they can be contaminants in the wastes generated at or released from the sites and they can be used in consumer products which can degrade and release the metals back to the environment This report examines the extent to which various sources contribute to environmental lead contamination at Superfund sites that are near lead mining areas and focuses on sources that contribute to lead contamination at sites near the Southeast Missouri Lead Mining District It recommends potential improvements in approaches used for assessing sources of lead contamination at or near Superfund sites **American Corrections** Matt DeLisi, Peter John Conis, 2013
