The Care And Handling Of Art Objects:

The Care and Handling of Art Objects Marjorie Shelley, 1987 The Metropolitan Museum of Art in New York houses one of the world's largest and most comprehensive collections of antiquities and works of art. Their preservation is a responsibility that involves everyone who serves the Museum and who has access to the collection. This handbook offers a practical guide to the ways in which different art objects should be handled and cared for whether they are on display in transit or in storage and it also explains some of the fundamental principles of conservation that underlie Museum practice. The first part of the book sets out guidelines for dealing with the entire spectrum of works in the Metropolitan Museum: paintings, drawings, and prints, textiles, costumes, musical instruments, and three-dimensional objects, whether monumental sculpture or filigree jewelry. In the second part, the emphasis is on matters and procedures that affect the collection in general, such as climate controls, light levels, and photography. Included at the end are a selected glossary of conservation terms, a short reading list, and space for the reader's own notes. Drawing on the professional experience of curators and conservators from many different departments, *The Care and Handling of Art Objects* has been put together primarily for those who work in the Metropolitan Museum. What it has to say, however, will be of great interest to others: private collectors, large and small museum visitors, and concerned members of the public. Publisher description

The Care and Handling of Art Objects Marjorie Shelley, 2019-06-25 The Metropolitan Museum of Art houses one of the world's largest and most comprehensive collections of works of art, from antiquities to modern and contemporary material. Their preservation is a responsibility shared by the many individuals employed at the Museum who oversee and have direct contact with the collection on a daily basis. *The Care and Handling of Art Objects*, first published in the 1940s and continually updated, offers a guide to the best practices in handling and preserving works of art while on display in storage and in transit. It explains many of the fundamental principles of conservation that underlie these methods. One of its goals is to make the complexities of caring for a collection readily accessible. The first part offers basic guidelines for the preservation of the diverse types of materials and art objects found in the Met. Each chapter addresses the physical characteristics specific to the particular category and the environmental handling and housing factors to which one should be alert to prevent damage and ensure their preservation. Written by experts in the respective specialty, it addresses the Museum's vast holdings, summarizing the most critical preservation issues, many of which are amplified by photographs. As the table of contents makes evident, these range from paintings on canvas and works on paper and photographs to furniture and objects made of stone, wood, and metals to arms and armor, upholstery, ethnographic materials, and many others. Part II succinctly describes factors that affect the collection as a whole, among them current environmental standards for

temperature relative humidity light exposure storage and art in transit Based on Museum protocols it addresses emergency preparedness and response and integrated pest management For easy reference it includes charts on storage and display conditions on factors contributing to deterioration and a glossary of conservation terms principles and housing materials referenced in the individual chapters Drawing upon the knowledge of conservators scientists and curators from many different departments as well as technicians and engineers whose expertise crosses boundaries of culture chronology medium and condition *The Care and Handling of Art Objects* is primarily directed to staff at the Met It is no less an invaluable resource for students collectors small museums museum study programs art dealers and members of the public who want to enhance their understanding of how works of art are safeguarded and the role environment handling and materials play in making this possible **The Metropolitan Museum of Art** Robert P.
