Real KSAs--knowledge, Skills & Abilities--for Government Jobs Anne McKinney,2003 Getting a federal government job can be a difficult experience because of the unusual and often complex paperwork Many federal jobs require KSAs which stands for Knowledge Skills and Abilities This book shows how to write up KSAs in order to present your qualifications and talents in the most effective manner Prototype Automated Measures of Command and Staff Performance William T. Holden,2001 This research and development effort continues the work by the U S Army Research Institute for the Behavioral and Social Sciences AM Armored Forces Research Unit Future Battlefield Conditions Team It focuses on the design and development of automated training and performance evaluation techniques A primary context for these efforts is digital brigade and below training requirements and environments For this project AM s objective was to design develop and demonstrate 20 prototype automated measures to improve training and evaluation for brigade and below command and staff performance The prototype automated measures developed were implemented during the Future Combat Command and Control FCC2 Concept Experimentation Program experiment conducted by the Mounted Maneuver Battlespace Lab MMBL at Fort Knox Kentucky The AM s purpose for participating in this experiment was to support the MMBL and the Army s need to gain additional information on future staff evaluation requirements in a virtual simulation environment and gather feedback for improvements to the prototype automated measures developed during this effort DTIC **A 21st Century**

Employability Skills Improvement Framework for the Construction Industry John Aliu,Clinton Aigbavboa,Wellington Thwala,2021-04-30 This book will provide readers with an understanding of the employability concept and develop an employability skills improvement model to enhance the employability of built environment graduates to foster economic development The developed model determines the influence of generic skills discipline specific skills work integrated learning emotional intelligence university industry collaboration outcomes and 4IR knowledge in predicting the outcomes of improved graduate employability The model is developed with a theoretical lens on existing frameworks of employability and skills development Whilst drawing comparisons with countries such as the UK USA Australia and Canada the authors present the results of a two stage Delphi survey in South Africa as a case study on the current state of skills development and on the

skills of the future The case study is presented in line with the South Africa s long term National Development Plan NDP aimed at developing the key capabilities and skills of its citizens by ensuring quality education on a broader scale by 2030 As automation continues to rapidly advance the pressures on universities to revamp and restructure their curricula have become increasingly necessary This book recommends that higher education institutions urgently need to intensify their efforts by introducing significant modifications to the science and technology curriculum to enable students to develop and acquire competencies in the rapidly emerging areas of artificial intelligence data science robotics advanced simulation data communication system automation real time inventory operations cloud computing and information technologies This implies that universities curriculum should be infused with 4IR thinking within the conventional primary sciences of biology chemistry and physics with greater emphasis on digital literacy to boost 4IR understanding amongst the graduates The book is therefore of interest to researchers and policy makers in the built environment that are placed in academia the construction industry or at consultancy levels it provides significant recommendations for universities as they intensify their efforts to develop graduates for the future
