Slough Peter Burgess,1999 **Slough** Peter Burgess,2005 Pocket Images Slough **A Century of Change in Music Education** Stephanie Pitts,2019-01-04 Published in 2000 Education in our schools is a constant feature of media headlines often blamed for many of society's ills Perceived throughout the ages as civilizing force music has a fundamental role to play in education yet the last twenty years have seen a consistent erosion of the time and money made available to music teachers in our schools This book is a timely reminder of how we have arrived at the current debates and challenges of music education Stephanie Pitts charts the history of music teaching in British secondary schools over the course of the twentieth century Each chapter looks at a significant period of music education history in which the ideas and practices of a generation were established and refined The main educational publications of each decade are examined from the early by MacPherson Somervell and Yorke Trotter to the more recent thinking of Paynter and Swanwick The shifting perceptions of music in the school curriculum are nowhere better highlighted than in the changing focus on children's engagement with music from the musical appreciation lessons of the 1920s and 1930s to the post war concentration on performance and the 1970s emphasis on improvisation and composition There and many other trends are discussed in the book allowing today's music educators to see their own practice in its historical context **A Century of Change** Orrin Grimmell Judd,1939 **A Half Century of Change in Bird Populations of the Lower Chippewa River, Wisconsin** Irven O. Global Change and Terrestrial Ecosystems Brian Harrison Walker, Will Steffen, 1996-11-13
 This major new book presents a collection of essays by leading authorities who address the current state of knowledge. The chapters bring together the early results of an international scientific research program designed to address what will happen to our ability to produce food and fiber and what effects there will be on biological diversity under rapid environmental change. This book addresses how these changes to terrestrial ecosystems will feed back to further environmental change. International in scope, this state-of-the-art assessment will interest policymakers, students, and scientists interested in global change, climate change, and biodiversity. Special features include descriptions of a dynamic global vegetation model, developing generic crop models, and a special section on the emerging discipline of global ecology.

Linguistic Change in French Rebecca Posner, 1997
 What is French and how has it changed over time? Can we distinguish language history from historical linguistics and language change from linguistic change? These questions are explored using copious material from the history of the French language, concentrating on changes in the relatively modern period. In particular, Posner explains how change comes about and how changes at different levels of language interact, and the role of sociological and ideological factors is set against the internal mechanisms that trigger change. This work makes a substantial contribution to the theory of linguistic change as well as to discussion of the relationship between language and history in French-speaking areas, including Canada and French Creole-speaking countries.

By helping people discover their connection with the natural world, we hope to foster a lifelong commitment to learning about and caring for the oceans on which all life depends.
