David R. Jones

Slovar Voennykh Terminov:

The Soviet Army's High Commands in War and Peace, 1941-1992 Richard W. Harrison, 2022-07-28 The first full treatment of the unique phenomenon of High Commands in the Soviet Army during World War II and the Cold War The war on the Eastern Front during 1941-45 was an immense struggle running from the Barents Sea to the Caucasus Mountains The vast distances involved forced the Soviet political military leadership to resort to new organizational expedients in order to control operations along the extended front These were the high commands of the directions which were responsible for two or more fronts army groups and along maritime axes one or more fleets In all five high commands were created along the northwestern western southwestern and North Caucasus strategic directions during 1941-42 However the highly unfavorable strategic situation during the first year of the war as well as interference in day to day operations by Stalin severely limited the high commands effectiveness As a consequence the high commands were abolished in mid 1942 and replaced by the more flexible system of supreme command representatives at the front A High Command of Soviet Forces in the Far East was established in 1945 and oversaw the Red Army's highly effective campaign against Japanese forces in Manchuria The Far Eastern High Command was briefly resurrected in 1947 as a response to the tense situation along the Korean peninsula and the ongoing civil war in China but was abolished in 1953 soon after Stalin's death Growing tensions with China brought about the recreation of the Far Eastern High Command in 1979 followed a few years later by the appearance of new high commands in Europe and South Asia However these new high commands did not long survive the collapse of the Soviet Union in 1991 and were abolished a year later The book relies almost exclusively on Soviet and post communist archival and other sources and is the first unclassified treatment of this subject in any country East or West

The Russian Way of War Richard W. Harrison, 2001 In this first comprehensive treatment of the subject Richard Harrison shows how this theory emerged and developed to become despite radically different political settings and levels of technology essential to the Red Army's victory over Germany in World War II

Soviet Military Operational Art David M. Glantz, 1991 David Glantz examines the Soviet study of war the re emergence of the operation level the evolution of the Soviet theory of operations in depth before 1941 and its application in the European theatre and the Far East between 1941 and 1945

Informing Statecraft Angelo Codevilla, 2002-06-07 Analyzing the American intelligence network senior research fellow at Hoover Institution Angelo Codevilla concludes that American intelligence efforts are desperately outdated in this masterful exploration of the field Publishers Weekly Based on years of research and experience working within the American intelligence network Angelo Codevilla argues that the intelligence efforts of the nation's government are outgrown and inconclusive Suggesting that the evolution of American intelligence since the Vietnam War and World War II has been erratic and unplanned Codevilla presents new efforts to be made within the intelligence network that would lead to strategized and effective methods of information gathering Connecting the lines between a need for successful intelligence efforts and a

strong government Informing Statecraft warns of how intelligence failures of the past will eventually pale in comparison to the malaise that plagued American intelligence in the twentieth century

Military Objectives in Soviet Foreign Policy Michael MccGwire,2010-12-01 This study concentrates on the military roots of Soviet policy It concentrates on how planning for the contingency of a world war shapes and distorts Soviet policy while producing a military posture and structure of forces that appear to the West as being far in excess of any legitimate defense needs The focus is on the military technical aspects of doctrine which is the responsibility of the military to implement The study does not dwell on the decisions that the Soviet political leaders would face in the course of a war except to note how the hierarchy of objectives would influence those decisions

Slavic Studies Murlin Croucher,1993 Soviet Military Operational Art Colonel David M. Glantz,2012-11-12 David Glantz examines the Soviet study of war the re emergence of the operation level and its connection with deep battle the evolution of the Soviet theory of operations in depth before 1941 and its refinement and application in the European theatre and the Far East between 1941 and 1945

Soviet Military Thinking Derek Leebaert,2021-01-26 This book first published in 1981 examines the influences affecting Soviet military thinking planning and theory in the later Cold War It offers for the first time an insight into the range of premises and calculations surrounding the Soviet conception of power and makes the connection between Soviet studies and military strategy a link often missed in the West It discusses comparative doctrines cultural differences arms control and specific security challenges between East and West

Operational And Strategic Lessons Of The War In Afghanistan, 1979-1990 Dr Stephen J. Blank,2014-08-15 The Soviet invasion of Afghanistan at the end of 1979 was in many respects a milestone in Soviet history On the one hand it represented the high water mark of Soviet intervention in Third World states and thus served as the archetypical example and justification for the intensification of the cold war in the early 1980s On the other hand the ultimate defeat and poor

performance by this military in Afghanistan was one of the key forces that triggered the drive for a comprehensive reform of the entire Soviet national security system and its decision making structures Thus this war had profound domestic and foreign repercussions This analysis focuses on the purely operational and strategic lessons of the war It insists that lessons of these kinds were present and that they offer significant insights both for such wars in general and for the course of Soviet military developments in the 1980s and 1990s These lessons also offer important clues concerning the reforms required in order to preserve democratic civilian control over the military It should also alert analysts everywhere as to the nature of local wars in the Third World in the 1990s a phenomenon that shows little sign of abating Though in many ways like all wars this war was unique it was not merely a series of random tactical exercises that were ultimately futile Rather like all wars it shows us something of the shape of our present and future if we are only insightful enough to understand it correctly
