Slow Emergencies:

Emergency Claire Laurier Decoteau, 2024-12-16 A forceful critique of how and why states failed to protect marginalized communities in their responses to the COVID 19 pandemic and the implications of ignoring the existing emergencies that exacerbated the pandemic's devastating effects The COVID 19 pandemic inaugurated a state of emergency unprecedented for most Americans Some could observe this emergency from the relative safety of their homes but those in marginalized communities without access to the same privileges were forced to risk their health and well being In Emergency sociologist Claire Laurier Decoteau documents and theorizes the emergencies of COVID 19 by looking at the experiences of Chicagoans and the policies that shaped their lives She describes the uneven racial impact of COVID 19 on Black and Latinx Chicagoans as a crisis within a crisis caused by a convergence of emergencies a state of emergency that protected white supremacy and wealth the slow emergencies racially marginalized populations have faced for decades due to the long term gutting of care infrastructure and deindustrialization and the sacrifice essential workers were asked to make to protect the United States economy As Decoteau shows the city's racial equity project used data to determine which communities would be given scarce resources but once positivity or death rates declined resources were retracted and redistributed elsewhere City officials thus attempted to manage these converging emergencies by manipulating epidemiological data and orchestrating systems for interpreting that data Decoteau makes clear that the emergencies precipitated by COVID 19 long predated the pandemic and that we will continue to live with their compounding crises if we do not tackle their structural underpinnings

Law, Climate Emergency and the Australian Megafires Nicole Rogers, 2021-09-09 This book addresses the ways in which the Black Summer megafires influenced the development of climate narratives throughout 2020 It analyses the global pandemic and its ensuing restrictions as a countervailing force in the production of such narratives Lives and properties were lost in the spring and summer of 2019 and 2020 when catastrophic bushfires burnt through millions of hectares of mainland Australia Nearly 3 billion native animals died And for millions of Australians and others worldwide it was through the Australian megafires that the global climate emergency became tangible and concrete no longer a comfortably deferred albeit problematic abstraction which could be consigned to future generations to deal with This book explores the legal and other implications of new understandings of climate emergency arising from the fires and the emergence of a hierarchy of emergencies as the pandemic came to dominate global and domestic political discourses It examines narratives of culpability and legal avenues for seeking retribution from government and big fossil fuel emitters It

also considers the impact of the fires on the burgeoning phenomenon of climate activism particularly in Australia and the ways in which pandemic restrictions curtailed such activism Finally the book reflects on the fires through the lenses offered by climate fiction and apocalyptic fiction more generally in order to consider how these shape and might shape our responses to them This important and timely book will appeal to environmental lawyers and socio legal theorists as well as other scholars and activists with interests in climate change and its impact It is recommended for anyone concerned about current and future climate disasters and the shortcomings in legal political and popular responses to the climate crisis **Life**

Habit's Pathways Tony Bennett,2023-08-28 Habit has long preoccupied a wide range of theologians philosophers sociologists psychologists and neuroscientists In Habit s Pathways Tony Bennett explores the political consequences of the varied ways in which habit s repetitions have been acted on to guide or direct conduct Bennett considers habit s uses and effects across the monastic regimens of medieval Europe in plantation slavery and the factory system through colonial forms of rule and within a range of medicalized pathologies He brings these episodes in habit s political histories to bear on contemporary debates ranging from its role in relation to the politics of white supremacy to the digital harvesting of habits in practices of algorithmic governance Throughout Bennett tracks how habit s repetitions have been articulated differently across divisions of class race and gender demonstrating that although habit serves as an apparatus for achieving success self fulfillment and freedom for the powerful it has simultaneously served as a means of control over women racialized peoples and subordinate classes

occupation of Okinawa he offers insight and direction for activists students academics and others dedicated to protecting and improving the well being of their communities and beyond It would be easy to succumb to pessimism and political apathy in the face of governing institutions that are increasingly unresponsive to calls for change and repressive in response to protest even as they violate human rights ignore existential climate catastrophes and concentrate power into fewer and fewer hands Instead Davis finds inspiration for genuine political change through social movements that are successfully replacing the state and taking over the day to day governance of threatened places From contesting environmental abuse to reasserting Indigenous sovereignty these social movements demonstrate how people can collectively wrest control over their communities from oppressive governments and manage them with a more egalitarian ethics of care Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions
