Chatzkel, 2003-08-07 Knowledge Capital How Knowledge Based Enterprises Really Get Built is an integrated structured set of conversations with thought leaders and key practitioners in the fields of intellectual capital and knowledge management who examine in the form of conversations the steps necessary for creating and implementing the various dimensions of a knowledge based enterprise These are the dimensions that need to be effectively addressed for the organization to successfully make the transition from an activity based organization to a truly knowledge based enterprise The conversations that make up Knowledge Capital are not studies of theory separated from practice or practice without a strong theoretical base Rather they are the stories of how knowledge based enterprises really get built in the words of the people who built them While every contributor begins from his or her own unique perspective and background each moves toward a convergent understanding of the core elements perspectives and practices involved These systemic conversations provide a body of knowledge and experience on how to craft and implement strategies as well as the how values learning performance relationships innovation and change play in the development of usable knowledge environment These explorations together lead to a mapping of what are quickly becoming the foundations of the next stage of the field Knowledge Capital gives the reader a readily accessible collection of insights and experiences essential for the new era in intellectual capital and knowledge management **Organizational**

Knowledge Facilitation through Communities of Practice in Emerging Markets Buckley, Sheryl,2016-03-31

Communities of Practice are accessible to both experts and new members of a particular community with diverse academic and cultural backgrounds as well as varying social expectations and experiences. Despite the tremendous opportunities for collective learning and knowledge sharing that Communities of Practice offer, not enough is known about these communities in emerging economies and their potential to facilitate cooperation between experts from around the world. Organizational Knowledge Facilitation through Communities of Practice and Emerging Markets seeks to fill the knowledge gap surrounding Communities of Practice and their role within developing nations. Focusing on critical topics related to different types of knowledge communities and the ways in which such communities generate innovation, this research-based publication is an ideal reference source for academics, business professionals, researchers, entrepreneurs, and those currently studying at the graduate level.

Knowledge Management Awad, Elias M. Awad,2007 The Knowledge Subject Matter Is A Subset Of Content Taught In The Decision Support Systems Course. This text is about knowledge: how to capture it, how to transfer it, how to share it, and how to manage it. Awad takes students through a process-oriented examination of the topic, striking a balance between the behavioral and technical aspects of knowledge management and use it.

Dreamcrafting Paul Levesque, Art McNeil,2003-02-16 Many people set out to achieve a dream, starting a business or learning to play the piano or publishing a book, but they don't succeed and the dream fizzles away. In many cases, these people have lots of skills and expertise, such as deep knowledge of the business or career they are interested in, so why don't they succeed? Paul Levesque and Art McNeil have discovered that making a dream come true requires cultivating skills of a higher order: macroskills that inevitably spell the difference between success and failure, no matter what the specifics of a person's dreams are. These are the skills. Dreamcrafting outlines in detail.

E-learning Strategies Don Morrison,2003-07-25 As more than 90% of spending on the Internet comes from brick-and-mortar companies, it is these operations that will form the client base for e-learning. This book shows those companies how to get e-learning implementation right the first time. Don Morrison explores and explains the whole implementation continuum: strategy, vendor selection, technology implementation, culture change, content development, and delivery. Most importantly, he stresses that the success or failure of an e-learning initiative is directly related to the underlying strategic thinking. Written for a more mature second-generation e-learning market, the book provides a practitioner's handbook to both guide the novice and inform the veteran. Focuses on the reader's needs. Focuses on the strategic issues of e-learning. Informed by key business drivers. Supported and endorsed by PwC Readership: Senior managers including CEOs, CIOs, CLOs, HR Directors, middle management responsible for implementing and/or delivering e-learning consultants.

Applications is a comprehensive resource on the latest advances and developments for creating a system of shared values and beliefs in business environments. Featuring extensive coverage across a range of relevant perspectives and topics such as organizational climate, collaboration orientation, and aggressiveness orientation, this book is ideally designed for business owners, managers, entrepreneurs, professionals, researchers, and students actively involved in the modern business realm.

Practical Aspects of Knowledge Management Dimitris Karagiannis, Ulrich Reimer, 2002-11-29. This book contains the papers presented at the 4th International Conference on Practical Aspects of Knowledge Management organized by the Department of Knowledge Management, Institute of Informatics and Business Informatics, University of Vienna. The event took place on 2002 December 2-3 in Vienna, Austria. The PAKM conference series is a forum for people to share their views, to exchange ideas, to develop new insights, and to envision completely new kinds of solutions to knowledge management problems because, to succeed in the accelerating pace of the Internet age, organizations will be obliged to efficiently leverage their most valuable and underleveraged resource: the intellectual capital of their highly educated, skilled, and experienced employees. Thus, next-generation business solutions must be focussed on supporting the creation of value by adding knowledge-rich components as integral parts in the work process. The authors, who work at the leading edge of knowledge management, have pursued integrated approaches which consider both the technological side and the business side and the organizational and cultural issues. We hope the papers covering a broad range of knowledge management topics will be valuable at the same extent for researchers and practitioners developing knowledge management approaches and applications. It was a real joy seeing the visibility of the conference increase and noting that knowledge management researchers and practitioners from all over the world submitted papers. This year, 90 papers and case studies were submitted from which 55 were accepted.

The Knowledge Entrepreneur Colin Coulson-Thomas, 2003. This unique book puts a whole new spin on knowledge management. Rather than re-stating the importance of the knowledge economy or detailing methods of knowledge management or acquisition, it explores how businesses can exploit their knowledge and information, focusing on the entrepreneurial opportunities that intellectual capital provides.

[Introduction to Knowledge Management](#) Kesheng Wang, Ove Rustung, Hjelmerik, Bernt Bremdal, 2001. Knowledge Management (KM) is a hybrid discipline containing elements of social sciences, technology, and business. KM focuses on creating and sharing knowledge. The discipline is a holistic system for management of intellectual capital, organization change, knowledge creation and sharing for continuous improvement and innovation, and organizational learning, resulting in increased value creation. This symbiosis of disciplines takes place within the organizations' vision, purpose, and strategy. *Introduction to Knowledge Management* provides a strategic roadmap for knowledge management and teaches how to implement KM in a company step by step.
