Neuromotor Immaturity in Children and Adults Sally Goddard Blythe,2015-06-05 Available to healthcare professionals for the first time this book contains proven screening tests to measure neuromotor immaturity in children and adults in order to provide a basis for referral and help Allows practitioners to screen for disorders of movement that can negatively affect educational performance and emotional function in children and adolescents Assesses instances where disorders of movement in adults are affecting thoughts and behavior as in panic disorder Provides a novel approach for health care professionals observing aberrant reflexes in the absence of more serious pathology Includes reproducible scoring

and observation sheets for practice and serves as the perfect complement to Assessing Neuromotor Readiness for Learning

The Discovery of Cerebellar-vestibular Syndromes and Therapies Harold N. Levinson, 2000 Raising Happy Healthy Children Sally Goddard Blythe, 2020-05-10 With new information carefully added this book examines the crucial early years from a child's perspective. It draws on the latest scientific research to show how the first few years determine the way children develop body and mind for the rest of their lives. The keys to this development are parents and in particular mothers. Raising Happy Healthy Children presents convincing research to show how a baby's relationship with its mother has a lasting deep impact. Recent social changes such as delayed motherhood, juggling of work-life balance, limited uptake of breastfeeding and use of parent substitute baby equipment and electronic devices are interfering with key developmental milestones that are essential for wellbeing in later life.

Total Concentration Harold N. Levinson, 1992 The ability to pay total attention to the subject at hand is an ability most of us lack to some extent. Noted psychiatrist Dr Harold Levinson believes poor concentration is a function problem that can be treated. In this book he shows how we can learn to overcome distractions and can even learn to make them work for us.

Phobia Free Harold N. Levinson, Steven Carter, 1988 Levinson, a professor of psychiatry at New York University Medical School, claims to have discovered that the inner ear is responsible for phobic behavior. He argues that such behavior consists of sensory misprocessing triggered by concussion, mononucleosis, prolonged air travel, menopause and similar physiologically destabilizing factors. Treatment can be limited to medications for motion sickness. Levinson's style may be overly insistent but he gives his controversial work a clear and convincing format that includes case histories and definitions of symptoms. His advice on obtaining proper diagnosis and treatment is particularly welcome. For subject collections. William Abrams, Portland State Univ Lib, Ore Library Journal.
