Stiff Justice Vol 32

Alexander Vietts Blake

Stiff Justice Vol 32:

Student Handbook of Criminal Justice and Criminology John Muncie, 2013-02 It discusses crime and criminology in relation to the media race Islam gender and politics and considers all the relevant theoretical debates that dominate criminology Chapters on the police courts probation and prisons are included along with more theoretical chapters regarding crime prevention youth justice and restorative and informal justice The Handbook also includes comparative materials and international criminal courts

Rethinking Drug Courts: International Experiences of a US Policy Export John Collins, Winifred Agnew-Pauley, Alexander Soderholm, 2019-02-15 What are drug courts Do they work Why are they so popular Should countries be expanding them or rolling them back These are some of the questions this volume attempts to answer Simultaneously popular and problematic loved and loathed drug courts have proven an enduring topic for discussion in international drug policy debates Starting in Miami in the 1980s and being exported enthusiastically across the world we now have a range of international case studies to re examine their effectiveness Whereas traditional debates tended towards binaries like do they work this volume attempts to unpick their export and implementation contextualising their efficacy Instead of a simple yes or no answer the book provides key insights into the operation of drug courts in various parts of the world The case studies range from a relatively successful small scale model in Australia to the large and unwieldy business of drug courts in the US to their failed scale up in Brazil and the small and institutionally adrift models that have been tried in England Scotland Wales and Ireland The book concludes that although drug courts can be made to work in very specific niche contexts the singular focus on them as being close to a silver bullet obscures the real issues that societies must address including but not limited to a more comprehensive and full spectrum focus on diverting drug involved individuals away from the criminal justice system

Towards a Universal Justice? Putting International Courts and Jurisdictions into Perspective Dário Moura Vicente, 2016-04-08 The recent proliferation of international courts and jurisdictions raises a number of important issues ranging from the redefinition of the role of the International Court of Justice to the recent emergence of domestic courts as international jurisdictions Towards a Universal Justice Putting International Courts and Jurisdictions into Perspective containing edited articles presented at the International Law Association's Regional Conference held in Lisbon offers a comprehensive overview of those issues and outlines challenges ahead for every branch of international law

Youth and Crime John Muncie, 2004-06-11 The Second Edition of this best selling text provides a fully revised and up to date critical analysis of a wide range of issues surrounding young people disorder and crime How and why have certain aspects of young people's behaviour come to be perceived as anti social and criminal Are young people now more of a threat than ever before How can we make sense of New Labour's youth justice reforms Is the youth justice system soft on crime Are young people more in need of protection than disciplinary punishment To develop a comprehensive criminology of youth the book deliberately moves

Imprisonment Seriously Kenneth G. Zysk,2002-04-01 Life imprisonment is a complex and drastic penal sanction It gives the State the power to curtail the liberty of offenders for the rest of their lives In many jurisdictions life imprisonment is the ultimate sanction for the most serious crimes It is frequently touted as an alternative to the death penalty At the same time life imprisonment is often imposed as a preventive measure where the offence alone does not justify using the ultimate sanction in the penal arsenal The complexity of life imprisonment is frequently overlooked Often it is assumed that it is not as drastic as it sounds as it will not be enforced for the whole life of the offender There may also be a reluctance to subject life imprisonment to close scrutiny lest its perceived suitability as an alternative to the death penalty be undermined This book tackles the complexity of life imprisonment head on by describing how various forms of it are imposed and implemented in the United States of America in England and Wales and in Germany as well as in the emerging international system of criminal justice From this basis it examines the justifications advanced for life imprisonment and the modifications that have resulted in individual jurisdictions in response to criticisms of its imposition and implementation At the same time the book develops a more general critique of life imprisonment It evaluates it against constitutional human rights standards that have been developed in many jurisdictions to judge the acceptability of punishment generally It concludes that some current practices in both the imposition and implementation of life imprisonment clearly are fundamentally unacceptable but that questions remain even about carefully implemented life sentences imposed for the most serious crimes The jurisprudential analysis provides the basis for a major re evaluation of life imprisonment and raises doubts about the unquestioning acceptance of this ultimate penalty **The Reasoner** ,1849 **The Genetics of Political Behavior** Michael

Ryan,2020-11-29 In this unique amalgam of neuroscience genetics and evolutionary psychology Ryan argues that leftists and rightists are biologically distinct versions of the human species that came into being at different moments in human evolution The book argues that the varying requirements of survival at different points in history explain why leftists and rightists have anatomically different brains as well as radically distinct behavioral traits Rightist traits such as callousness and fearfulness emerged early in evolution when violence was pervasive in human life and survival depended on the fearful anticipation of danger Leftist traits such as pro sociality and empathy emerged later as environmental adversity made it necessary for humans to live in larger social groups that required new adaptive behavior The book also explores new evolutionary theories that emphasize the role of the environment in shaping not only human political behavior but also humans genetic architecture With implications for the future of politics the book explores how the niche worlds we build for ourselves

through political action can have consequences for the evolution of the species Proposing a new way of understanding human politics this is fascinating reading for students and academics in psychology the social sciences and humanities as well as general readers interested in political behavior *God in the Details* Eric Michael Mazur, Kate McCarthy, 2001 Seeking to explore the blurred boundary between religion and pop culture *God in the Details* offers a provocative look at the breadth diversity and persistence of religious themes in contemporary American consciousness Representing a diverse range of disciplines the contributors critically assess the ways in which American popular culture reappropriates traditional religious symbols to serve the purposes of particular communities **The Law Times** ,1866 **Daily Prayer Platform: Volume Two (Large Print Edition)** Keith D.
