The Nature and Sources of the Law John Chipman Gray, 1909 **The Nature and Sources of the Law by John Chipman Gray** John Chipman Gray, 2019-08-22 First published in 1909 and then again in 1997 John Chipman Gray 1839-1915 spent the greater part of his professional life as a professor at Harvard Law School where he taught property trusts and future interests *The Nature and Sources of the Law* was first published in 1909 The book is divided into two parts which respectively look at Nature and Sources In Part I Gray warns that the study of jurisprudence in isolation could lead to dogmatism Rather he advocates the structure offered by common law with its reliance on flexible interpretations of statutes the use of all relevant cultural inputs and a highly adaptable approach to the resolution of disputes Gray in Part II turns his attention to sources of the law and begins with statutes Here he asserts that judges are the ones who actually turn into law going against the conventional scholarship that judges merely interpret statutes He also extensively examines the influence of tradition and the common law *The Nature and Sources of the Law* John Chipman Gray, 1920 NATURE AND SOURCES, OF THE LAW JOHN CHIPMAN.
