The Nautical Style An Aspect Of The Functional Tradition:

The Nautical Style; an Aspect of the Functional Tradition, by Eric De Mare Eric Samuel De Maré,1973 **From the Lighthouse: Interdisciplinary Reflections on Light** Veronica Strang,Tim Edensor,Joanna Puckering,2018-04-27 What is a lighthouse What does it mean What does it do This book shows how exchanging knowledge across disciplinary boundaries can transform our thinking Adopting an unconventional structure this book involves the reader in a multivocal conversation between scholars poets and artists Seen through their individual perspectives lighthouses appear as signals of safety beacons of enlightenment phallic territorial markers and memorials of historical relationships with the sea However the interdisciplinary conversation also reveals underlying and sometimes unexpected connections It elucidates the human and non human evolutionary adaptations that use light for signalling and warning the visual languages created by regularity and synchronicity in pulses of light how lighthouses have generated a whole family of related material objects and technologies and the way that light flows between social and material worlds *Modernism and the Professional Architecture Journal* Torsten Schmiedeknecht,Andrew Peckham,2018-06-27 The production of this book stems from two of the editors longstanding research interests the representation of architecture in print media and the complex identity of the second phase of modernism in architecture given the role it played in postwar reconstruction in Europe While the history of postwar reconstruction has been increasingly well covered for most European countries research investigating postwar architectural magazines and journals across Europe their role in the discourse and production of the built environment and particularly their inter relationship and differing conceptions of postwar architecture is relatively undeveloped Modernism and the Professional Architecture Journal sounds out this territory in a new collection of essays concerning the second phase of the reception and assimilation of modernism in architecture as it was represented in professional architecture journals during the period of postwar reconstruction 1945 1968 Professional architecture journals are often seen as conduits of established facts and knowledge The role mainstream publications play however in establishing movements trends or debates tends to be undervalued In the context of the complex undertaking of postwar reconstruction the shortage of resources political uncertainty and the biographical complexities of individual architects the chapters on key European architecture journals collected here reveal how modernist architecture and its discourse was perceived and disseminated in different European countries *De la construcción a los proyectos* James Strike,2004 Este libro va dirigido primordialmente a los estudiantes de arquitectura ingenier a y construcci n pero servir tambi n de est mulo til y de esquema cr tico a los profesionales implicados en el proceso de dise o y ser una obra de referencia para cual **Building the Post-war World** Nicholas Bullock,2002 Building the Post War World offers for the first time an overall account of Modern Architecture in the decade after the Second World War The Nautical Style Eric Samuel De Maré,1973 Includes material on inland waterways **Catalog of the Avery Memorial Architectural Library of Columbia University. 2d Ed., Enl** Avery Library,1982

Aesthetics of Built Form Alan Holgate,1992 This book concentrates on presenting facts and opinions about the ways in which people respond to built form drawing on a wide range of literature written by theorists critics and practicing architects The subject matter incorporates perspectives from the psychology of aesthetic appreciation the linguistic content of built form the social ramifications of architecture and as an extension of this the often fraught dialogue between the architect and the engineer The book is richly illustrated with examples of buildings from all periods in history and should be a stimulating addition to the continuing and topical debate between functionalist and aesthetic considerations affecting the planning of buildings
