The Neural Basis of Human Belief Systems Frank Krueger, Jordan Grafman, 2012-08-21 Is the everyday understanding of belief susceptible to scientific investigation Belief is one of the most commonly used yet unexplained terms in neuroscience Beliefs can be seen as forms of mental representations and one of the building blocks of our conscious thoughts This book provides an interdisciplinary overview of what we currently know about the neural basis of human belief systems and how different belief systems are implemented in the human brain The chapters in this volume explain how the neural correlates of beliefs mediate a range of explicit and implicit behaviours ranging from moral decision making to the practice of religion Drawing inferences from philosophy psychology psychiatry religion and cognitive neuroscience the book has important implications for understanding how different belief systems are implemented in the human brain and outlines the directions which research on the cognitive neuroscience of beliefs should take in the future The Neural Basis of Human Belief Systems will be of great interest to researchers in the fields of psychology philosophy psychiatry and cognitive neuroscience **The Neural Basis of Behavior** A.L. Beckman, 2012-12-06 The Symposium on the Neural Basis of Behavior from which this volume was produced was held at the Alfred I duPont Institute on June 7 and 8 1979 It brought outstanding investigators in four fundamental areas of behavioral neurobiology into juxtaposition there to provide an integrated multidisciplinary perspective on behaviorally significant brain mechanisms Particular emphasis was placed on topics of interest to neurobiologists as well as to clinicians in neurological and psychiatric disciplines The session on central activity states was selected as an appropriate point of departure because the continuum of brain activity states extending from the natural depression of hibernation through the heightened levels of arousal accompanying learning is such a clear and basic determinant of behavioral output The papers on learning and memory outlined diverse approaches to understanding the basis of these interrelated CNS capabilities that constitute the neural basis of behavioral adaptation Finally the topics of affective states and mechanisms of pain provided a focus of clinically relevant discussion covering multiple levels of

functional and anatomical CNS organization The success of the symposium bore testimony to the excellence of the presentations and to the symbiosis of their content both are preserved herein The support and encouragement of Dr G Dean MacEwen Medical Director of the Alfred I duPont Institute is gratefully acknowledged Alexander L Beckman Wilmington July 1979 The Neural Basis of Behavior PART I Central Activity States Copyright 1982 Spectrum Publications Inc **The Neural Basis of Human Behaviour** Harold Saxton Burr,1960 **The brain meets the body: Neural basis of cognitive contribution in movement for healthy and neurological populations** Daniela De Bartolo,Valeria Belluscio,Alex Martino Cinnera,Viviana Betti,2023-11-06 *The cognitive and neural bases of human tool use* François Osiurak,Cristina Massen,2015-02-12 Humans are not unique in using tools But human tool use differs from that known to occur in nonhumans in being very frequent spontaneous and diversified So a fundamental issue is what are the cognitive and neural bases of human tool use This Research Topic of Frontiers provides a venue for leading researchers in the field of tool use to present original research papers integrative reviews or theoretical articles that further our understanding of this topic Articles address a wide range of issues including for instance the nature of the underlying representations e g conceptual sensorimotor the mechanisms supporting the incorporation of tools into body schema the link between imitation and tool use or the evolutionary origins of human tool use Articles are included from experimental psychology neuropsychology neuroimaging neurophysiology developmental psychology ethology comparative psychology and ergonomics The goal of this Research Topic of Frontiers is to provide a state of the art view of the field Neurobiology of Mental Illness Dennis S. Charney,Eric J. Nestler,2011-05-20 This is a new edition of the first comprehensive text to show how the advances in molecular and cellular biology and in the basic neurosciences have brought the revolution in molecular medicine to the field of psychiatry The book begins with a review of basic neuroscience and methods for studying neurobiology in human patients then proceeds to discussions of all major psychiatric syndromes with respect to knowledge of their etiology pathophysiology and treatment Emphasis is placed on synthesizing information across numerous levels of analysis including molecular biology and genetics cellular physiology neuroanatomy neuropharmacology and behavior and in translating information from the basic laboratory to the clinical laboratory and finally to clinical treatment Editors Dennis Charney and Eric Nestle along with their six section editors and over 150 contributors have revised and updated all 80 chapters from the previous edition and have added new chapters on topics relating to for example genetics experimental therapeutics and late life mood disorders Both a textbook and a reference book Neurobiology of Mental Illness is intended for psychiatrists neuroscientists and upper level students The Neural Basis of Mentalizing Michael Gilead,Kevin N. Ochsner,2021-05-11 Humans have a unique ability to understand the beliefs emotions and intentions of others a capacity often referred to as mentalizing Much research in psychology and neuroscience has focused on delineating the mechanisms of mentalizing and examining the role of mentalizing processes in other domains of cognitive and affective functioning The purpose of the book is to provide a
