The New Architecture and The Bauhaus Walter Gropius, 1965-03-15 One of the most important books on the modernist movement in architecture written by a founder of the Bauhaus school One of the most important books on the modern movement in architecture The New Architecture and The Bauhaus poses some of the fundamental problems presented by the relations of art and industry and considers their possible practical solution Gropius traces the rise of the New Architecture and the work of the now famous Bauhaus and with splendid clarity calls for a new artist and architect educated to new materials and techniques and directly confronting the requirements of the age *The New Architecture and the Bauhaus. *The Bauhaus and America* Margret Kentgens-Craig, 2001 After the Bauhaus's closing in 1933 many of its protagonists moved to the United States where their acceptance had to be cultivated In this book Margret Kentgens Craig shows that the fame of the Bauhaus in America was the result not only of the inherent qualities of its concepts and products but also of a unique congruence of cultural supply and demand of a consistent flow of information and of fine tuned marketing Thus the history of the American reception of the Bauhaus in the 1920s and 1930s foreshadows the patterns of fame making that became typical of the post World War II art world **BOOK JACKET** New Architecture and Technology Gyula Sebestyen, Christopher Pollington, 2007-06-07 Many books have covered the topics of architecture materials and technology New Architecture and Technology is the first to explore the interrelation between these three subjects It illustrates the impact of modern technology and materials on architecture The book explores the technical progress of building showing how developments both past and present are influenced by design methods It provides a survey of contemporary architecture as affected by construction technology It also explores aspects of building technology within the context of general industrial social and economic developments The reader will acquire a vocabulary covering the entire range of structure types and learn a new approach to understanding the development of design The New Architecture and the Bauhaus ... Translated from the German by P. Morton Shand, Etc. [With Illustrations.]. Walter Gropius, Philip Morton Shand, 1965 Building the New World Valerie Fraser, 2000 Brasilia Caracas Mexico City Rio de Janeiro cities synonymous with some of the most innovative and progressive architecture of the past century Revolt and Reform in Architecture's Academy William Richards, 2016-12-01 Revolt and Reform in Architecture's Academy uniquely addresses the complicated relationship between architectural education and urban renewal in the 1960s which paved the way for what is today known as public interest design Through an examination of curricular reforms at Columbia University's and Yale University's schools of architecture in the 1960s this book translates the urban crisis through the experiences of two influential groups of architecture students

as well as their contributions to design's lexicon. The book argues that urban renewal and campus expansion half a century ago recast architectural education at two schools whose host cities, New York and New Haven, were critical sites for political, social, and urban upheaval in America. The urban challenges of that time are the same challenges rapidly growing cities face today: access, equity, housing, and services. As architects, architects in training, and architecture students continue to wrestle with questions surrounding how design may serve a broadly defined public interest, this book is a timely assessment of the forces that have shaped the debate.
