Smart Mobs The Next Social Revolution:

Smart Mobs Howard Rheingold, 2007-03-21 From Tokyo to Helsinki Manhattan to Manila Howard Rheingold takes us on a journey around the world for a preview of the next techno cultural shift a shift he predicts will be as dramatic as the widespread adoption of the PC in the 1980s and the Internet in the 1990s The coming wave says Rheingold is the result of super efficient mobile communications cellular phones personal digital assistants and wireless paging and Internet access devices that will allow us to connect with anyone anywhere anytime From the amusing Lovegetty devices in Japan that light up when a person with the right date potential characteristics appears in the vicinity to the extraordinary the overthrow of a repressive regime in the Philippines by political activists who mobilized by forwarding text messages via cell phones Rheingold gives examples of the fundamentally new ways in which people are already engaging in group or collective action He also considers the dark side of this phenomenon such as the coordination of terrorist cells threats to privacy and the ability to incite violent behavior Applying insights from sociology artificial intelligence engineering and anthropology Rheingold offers a penetrating perspective on the brave new convergence of pop culture cutting edge technology and social activism At the same time he reminds us that as with other technological revolutions the real impact of mobile communications will come not from the technology itself but from how people use it resist it adapt to it and ultimately use it to transform themselves their communities and their institutions

Lone Wolf Terror and the Rise of Leaderless Resistance George Michael, 2021-04-30 On July 22 2011 Anders Behring Breivik detonated a car bomb in downtown Oslo Norway He didn't stop there traveling several hours from the city to ambush a youth camp while the rest of Norway was distracted by his earlier attack That's where the facts end But what motivated him Did he have help staging the attacks The evidence suggests a startling truth that this was the work of one man pursuing a mission he was convinced was just If Breivik did indeed act alone he wouldn't be the first Timothy McVeigh bombed a federal building in Oklahoma City based essentially on his own motivations Eric Robert Rudolph embarked on a campaign of terror over several years including the Centennial Park bombing at the 1996 Olympics Ted Kaczynski was revealed to be the Unabomber that same year And these are only the most notable examples As George Michael demonstrates in *Lone Wolf Terror and the Rise of Leaderless Resistance* they are not

isolated cases Rather they represent the new way warfare will be conducted in the twenty first century Lone Wolf Terror investigates the motivations of numerous political and ideological elements such as right wing individuals ecoextremists foreign jihadists and even quasi governmental entities In all these cases those carrying out destructive acts operate as lone wolves and small cells with little or no connection to formal organizations Ultimately Michael suggests that leaderless resistance has become the most common tactical approach of political terrorists in the West and elsewhere **eCulture**
