

In *Step-by-Step Knifemaking*, David Boye takes you through each stage in the design and fabrication of a knife.

The first step is cutting the blank from new or used steel, then trimming and shaping it on a grinder.

Next, the brass pieces like the bolsters are cut and brazed in place. The cutting edge of the blade is tempered and the back of the blade annealed.

Following progressively finer grinding and polishing steps, the blade is coated with resist and a design scratched into it.

After the design is acid-etched into the steel, the remaining resist is removed, the handle is glued and riveted in place and the entire knife is given a final polishing.
