Stephane Beel Architect:

Stéphane Beel Architecten Christophe Van Gerreway, Mil De Kooning, 2012 This is the long awaited overview of the recent works of architect Stéphane Beel As productive and *Stéphane Beel Architect* Stéphane Beel, 1999 Stéphane Beel made his surprising debut in 1985 with a house in Zoersel in which he brilliantly transformed all the details of the site to create an extraordinary home Since then he has pulled off several similar feats At Villa M in Zedelgem he converted an overgrown farmhouse garden into an inhabitable enclosed structure and in 1996 he transformed a dairy farm in Eekio Belgium into an office building This book includes an essay by Bekaert a conversation between Beel Mil de Kooning and Verschaffel and a complete list of Beel's work **Stephane Beel, architect** Manu Claeys, Pascal Cornet, Geert Bekaert, 1999

Stéphane Beel Stéphane Beel, 2005 **Housing + Single-Family Housing** Manuel Gausa, Jaime Salazar, 2005-05-12 As cities evolve architects are constantly searching for appropriate architectonic solutions and in this book the authors present a systematic examination of innovative single family houses and residential buildings in the context of present day cities The latest developments are reviewed in essays and thematic chapters discuss such topics as low energy building the use of prefabricated materials or low budget building A range of international examples from architects such as Wiel Arets Shigeru Ban Ben van Berkel Kees Christiaanse Philippe Gazeau Frank O Gehry Steven Holl Hans Kollhoff Morger Degelo MVRDV Jean Nouvel Kas Oosterhuis illustrate the subjects discussed Housing and Single Family Housing were previously published separately each proving hugely popular Now both volumes have been incorporated into a single low priced edition

Contemporary Architects of the Low Countries Hans Ibelings, Francis Strauven, 2000 *Living in Brussels*, 2002 **A Critical History of Contemporary Architecture** Elie G. Haddad, David Rifkind, 2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects The Practice Turn in Architecture: Brussels after 1968 Isabelle Doucet, 2016-07-07 What makes a city What makes architecture And what is to be included in the discussions of architecture and the city Attempting to answer such ambitious questions this book starts from a city's specificity and complexity In response to recent debates in architectural theory around the agency and locus of critical action this book tests the potential of criticality through practice Rather than through conceptual and ideological categorisations it studies how

architecture and criticality work within specific circumstances Brussels a complex city with a turbulent architectural and urban past forms a compelling case for examining the tensions between urban politics architectural imaginations society's needs and desires and the city's history and fabric Inspired by pragmatist relational philosophies this book tests the potential of criticality through practice It studies a series of critical actions and tools which occurred in Brussels architectural and urban culture after 1968 Weaved together Brussels architectural production emerges from a variety of actors including architects urban policy makers activists social workers and citizens but also architectural movements and ideologies urban renewal programs urban traumas plans and projects and mundane everyday practices and constructions This book contributes to the study of Brussels and offers a timely contribution to recent scholarship on the critical reappraisal of architectural debates from the 1960s through to the 1990s In addition by showing how pragmatist relational philosophies can be made relevant for architectural theory the book opens hopeful potentials for how architectural theory can better contribute to the formulation of a critical agenda for architecture

Modern Architecture: A Critical History (Fifth) (World of Art) Kenneth Frampton, 2020-09-08 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects this book is the definitive history of modern architecture For this extensively revised and updated fifth edition of Modern Architecture Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates This new edition features completely redesigned interiors and an updated and expanded bibliography making this volume more indispensable than ever
