The Negev The Challenge Of A Desert:

The Negev Michael Evenari, Leslie Shanan, Naphtali Tadmor, 1982 The Negev first published over a decade ago told the story of some twenty years of study of southern Israel's desert. It synthesized the findings of botanists, geologists, soil scientists, agronomists, archaeologists, historians, and engineers and told how the applications of their work produced an agricultural surplus in this forbiddingly dry, hot region. Now Michael Evenari has amplified the book with data from another decade of work. He describes the efforts at a new farm at Wadi Mashash, extends the weather data another ten years, presents further work on the adaptations of plants and animals to desert conditions, and takes a much deeper look at the historical precedents for the method of runoff agriculture which has made the desert bloom. *The Negev : the Challenge of a Desert*

Narratives Thomas E. Levy, Ian W. N. Jones, 2017-11-21 This volume asks how the current Information Technology Revolution influences archaeological interpretations of techno-social change. Does cyber archaeology provide a way to breathe new life into grand narratives of technological revolution and culture change, or does it further challenge these high-level theoretical explanations? Do digital recording methods have the potential to create large regional-scale databases to ease investigation of high-level theoretical issues, or have they simply exposed deeper issues of archaeological practice that prevent this? In short, this volume cuts beyond platitudes about the revolutionary potential of the Information Technology Revolution and instead critically engages both its possibilities and limitations. The contributions to this volume are drawn from long-term regional studies employing a cyber archaeology framework primarily in the southern Levant, a region with rich archaeological data sets spanning the Paleolithic to the present day. As such, contributors are uniquely placed to comment on the interface between digital methods and grand narratives of long-term techno-social change. *Cyber Archaeology and Grand Narratives* provides a much-needed challenge to current approaches and a first step toward integrating innovative digital methods with archaeological theory. **The Archaeology of Drylands** Graeme Barker, David

Gilbertson, 2003-09-02 Many dryland regions contain archaeological remains which suggest that there must have been intensive phases of settlement in what now seem to be dry and degraded environments. This book discusses successes and failures of past land use and settlement in drylands and contributes to wider debates about desertification and the sustainability of dryland settlement. *Arid Land Ecosystems: Volume 2, Structure, Functioning and Management* D. W.

Goodall, R. A. Perry, K. M. W. Howes, 2009-03-19 This volume was first published in 1981. The history of man's use of arid lands is a sad record of deterioration of the natural resource base and of low and declining living standards for the 300 million people who live in them. One prerequisite to meeting the challenge of reversing the deterioration and of raising living standards is a sound knowledge of the natural ecosystems. **Let Shepherding Endure** Gideon M. Kressel, 2012-02-01

Examining the crucial problems confronting present day livestock breeders principally Bedouin and Jews in Israel but also pastoral nomads in neighboring Middle Eastern countries Let *Shepherding Endure* proposes new ways for these governments to enhance and sustain the long term future development of shepherding communities Adopting a broad historical and anthropological perspective on the topic and assessing various pastoral relief programs Kressel proposes an alternative program whereby the region s states would promote a brand of pastoralism that preserves rangeland herding while keeping in step with the contemporary cultural and political context This truly visionary set of recommendations would have several dividends especially for the Bedouin their cultural legacy in danger of obsolescence would be preserved while at the same time enhancing both their pastoral skills and ability to secure a livelihood from herding **Walking the Land** Shay

Rabineau,2023-01-03 Israel has one of the most extensive and highly developed hiking trail systems of any country in the world Millions of hikers use the trails every year during holiday breaks on mandatory school trips and for recreational hikes *Walking the Land* offers the first scholarly exploration of this unique trail system Featuring more than ten thousand kilometers of trails marked with hundreds of thousands of colored blazes the trail system crisscrosses Israeli controlled territory from the country s farthest borders to its densest metropolitan areas The thousand kilometer Israel National Trail crosses the country from north to south Hiking trails and the ubiquitous three striped trail blazes appear everywhere in Israeli popular culture they are the subjects of news articles radio programs television shows best selling novels government debates and even national security speeches Yet the trail system is almost completely unknown to the millions of foreign tourists who visit every year and has been largely unstudied by scholars of Israel *Walking the Land* explores the many ways that Israel s hiking trails are significant to its history national identity and conservation efforts *The History of Ancient*
