Nationalisation Keith Coleman, 1991 Keith Coleman makes a timely and refreshing contribution to a debate more often obscured by dogmatism and hot air than rational discussion His eye remains unerringly on the central problem of structural inequality particularly in South Africa Frederick van Zyl Slabbert IDASA director *Routledge Library Editions: Economic Geography* Various, 2021-06-23 The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization *Transnational Corporations and Uneven Development (RLE International Business)* Rhys Jenkins, 2013-02-15 Is the transnational corporation TNC an engine of growth capable of eliminating international economic inequalities or a major obstacle to development through a massive drain of surplus to advanced countries This book presents five different perspectives on the role of TNCs Neo Classical Global Reach Neo Imperialist Neo Fundamentalist Internationalization of capital The author looks at their effect on local labour and capital and considers the future prospects for TNC involvement in the Third World The book provides an excellent comparative analysis

The Dynamics of Market Integration Kenneth Kaoma Mwenda, 2000 This book looks at contemporary issues facing financial markets in Eastern and Southern Africa The book addresses strategies for capital market integration and development on a region wide basis An argument is made that the establishment of a regional stock exchange and the promotion of multiple listings and cross border trade in securities would stimulate increased liquidity on national stock exchanges in Eastern and Southern Africa Lessons of experience are drawn from other regions and a case is made against transplanting models of a regional stock exchange from one region to another The book argues that African countries may however use lessons of experience from other regions as points of reference while pursuing their own discourse of self determination Each case is unique and is thus surrounded by different variables The book covers developments in regions such as the European Union francophone West Africa and Eastern and Southern Africa Indeed an international and comparative perspective is provided
