target the influenced effects The volume also examines theories that are most relevant to social influence as well as social influence in applied settings The chapters contribute to the renaissance of interest in social influence by showing that it is time to reexamine classic topics in social influence by illustrating how integrations elaborations that advance our understanding of social influence processes are now possible by revealing gaps in the social influence literature and by suggesting future lines of research Perhaps the most important of these lines of work will take into account the change from traditional social influence that occurs face to face to social media mediated influence that is likely to characterize many of our interactions in the future
