The Rural Midwest Since World War II J. L. Anderson,2014-02-01 J L Anderson seeks to change the belief that the Midwest lacks the kind of geographic coherence historical issues and cultural touchstones that have informed regional identity in the American South West and Northeast The goal of this illuminating volume is to demonstrate uniqueness in a region that has always been amorphous and is increasingly so Midwesterners are a dynamic people who shaped the physical and social landscapes of the great midsection of the nation and they are presented as such in this volume that offers a general yet informed overview of the region after World War II The contributors most of whom are Midwesterners by birth or residence seek to better understand a particular piece of rural America a place too often caricatured misunderstood and ignored However the rural landscape has experienced agricultural diversity and major shifts in land use Farmers in the region have successfully raised new commodities from dairy and cherries to mint and sugar beets The region has also been a place where community leaders fought to improve their economic and social well being women redefined their roles on the

farm and minorities asserted their own version of the American Dream The rural Midwest is a regional melting pot and contributors to this volume do not set out to sing its praises or by contrast assume the position of Midwestern modesty and self deprecation The essays herein rewrite the narrative of rural decline and crisis and show through solid research and impeccable scholarship that rural Midwesterners have confronted and created challenges uniquely their own

Rethinking Home Joseph A. Amato,2002-04-01 Joseph A Amato proposes a bold and innovative approach to writing local history in this imaginative wide ranging and deeply engaging exploration of the meaning of place and home Arguing that people of every place and time deserve a history Amato draws on his background as a European cultural historian and a prolific writer of local history to explore such topics as the history of cleanliness sound anger madness the clandestine and the environment in southwestern Minnesota While dedicated to the unique experiences of a place his lively work demonstrates that contemporary local history provides a vital link for understanding the relation between immediate experience and the metamorphosis of the world at large In an era of encompassing forces and global sensibilities Rethinking Home advocates the power of local history to revivify the individual the concrete and the particular This singular book offers fresh perspectives themes and approaches for energizing local history at a time when the very notion of place is in jeopardy Amato explains how local historians shape their work around objects we can touch and institutions we have directly experienced For them theory always gives way to facts His vivid portraits of individual people places situations and cases which include murders crop scams and taking custody of the law are joined to local illustrations of the use of environmental and ecological history This book also puts local history in the service of contemporary history with the examination of recent demographic social and cultural transformations Critical concluding chapters on politics and literature especially Sinclair Lewis s Main Street and Longfellow s Hiawatha show how metaphor and myth invent distort and hold captive local towns peoples and places

Martin,2005-04-28 A small but growing number of immigrants today are moving into new settlement areas such as Winchester Va Greensboro N C and Salt Lake City Utah that lack a tradition of accepting newcomers Just as the process is difficult and distressing for the immigrants it is likewise a significant cause of stress for the regions in which they settle Long homogeneous communities experience overnight changes in their populations and in the demands placed on schools housing law enforcement social services and other aspects of infrastructure Institutions have not been well prepared to cope Local governments have not had any significant experience with newcomers and nongovernmental organizations have been overburdened or simply nonexistent There has been a substantial amount of discussion about these new settlement areas during the past decade but relatively little systematic examination of the effects of immigration or the policy and programmatic responses to it Beyond the Gateway is the first effort to bridge the gaps in communication not only between

the immigrants and the institutions with which they interact but also among diverse communities across the United States dealing with the same stresses but ignorant of each others responses whether successes or failures
