The End of a Global Pox Bob H. Reinhardt, 2015-06-24 By the mid twentieth century smallpox had vanished from North America and Europe but continued to persist throughout Africa Asia and South America In 1965 the United States joined an international effort to eradicate the disease and after fifteen years of steady progress the effort succeeded Bob H Reinhardt demonstrates that the fight against smallpox drew American liberals into new and complex relationships in the global Cold War as he narrates the history of the only cooperative international effort to successfully eliminate a human disease Unlike other works that have chronicled the fight against smallpox by offering a biography of the disease or employing a triumphalist narrative of a public health victory *The End of a Global Pox* examines the eradication program as a complex exercise of American power Reinhardt draws on methods from environmental medical and political history to interpret the global eradication effort as an extension of U S technological medical and political power This book demonstrates the far reaching manifestations of American liberalism and Cold War ideology and sheds new light on the history of global public health and development

Mummies, Cannibals and Vampires Richard Sugg, 2015-11-06 *Mummies Cannibals and Vampires* charts in vivid detail the largely forgotten history of European corpse medicine which saw kings ladies gentlemen priests and scientists prescribe swallow or wear human blood flesh bone fat brains and skin in an attempt to heal themselves of epilepsy bruising wounds sores plague cancer gout and depression In this comprehensive and accessible text Richard Sugg shows that far from being a medieval therapy corpse medicine was at its height during the social and scientific revolutions of early modern Britain surviving well into the eighteenth century and amongst the poor lingering stubbornly on into the time of Queen Victoria Ranging from the execution scaffolds of Germany and Scandinavia through the courts and laboratories of Italy France and Britain to the battlefields of Holland and Ireland and on to the tribal man eating of the Americas *Mummies Cannibals and Vampires* argues that the real cannibals were in fact the Europeans Picking our way through the bloodstained shadows of this remarkable secret history we encounter medicine cut from bodies living and dead sacks of human fat harvested after a gun battle gloves made of human skin and the first mummy

to appear on the London stage Lit by the uncanny glow of a lamp filled with human blood this second edition includes new material on exo cannibalism skull medicine the blood drinking of Scandinavian executions Victorian corpse stroking and the magical powers of candles made from human fat In our quest to understand the strange paradox of routine Christian cannibalism we move from the Catholic vampirism of the Eucharist through the routine filth and discomfort of early modern bodies and in to the potent numinous source of corpse medicine s ultimate power the human soul itself Now accompanied by a companion website with supplementary articles interviews with the author related images summaries of key topics and a glossary the second edition of *Mummies Cannibals and Vampires* is an essential read for anyone interested in the history of medicine early modern history and the darker hidden past of European Christendom **World on Fire** Mark

Rowlands,2021 The philosopher Mark Rowlands takes a novel perspective on the problem of climate change and how to address it With energy consumption at the core of the issue he claims climate extinction and pestilence as three epoch defining environmental issues of our time Rowlands proposes a single solution to all three breaking our collective habit of eating animals Bringing to bear analytic rigor and empirical data Rowlands argues that reversing the industrial farming of animals for our consumption will both significantly reduce energy emissions and allow for free space to aggressively reforest land being used by industrial animal farms to mitigate the effects of climate change **IR** James M. The Cure in the Code Peter W Huber,2013-11-12 Never before have two revolutions with so much potential to save and prolong human life occurred simultaneously The converging synergistic power of the biochemical and digital revolutions now allows us to read every letter of life s code create precisely targeted drugs to control it and tailor their use to individual patients Cancer diabetes Alzheimer s and countless other killers can be vanquished if we make full use of the tools of modern drug design and allow doctors the use of modern data gathering and analytical tools when prescribing drugs to their patients But Washington stands in the way clinging to outdated drug approval protocols developed decades ago during medicine s long battle with the infectious epidemics of the past Peter Huber an expert in science technology and public policy demonstrates why Washington s one size fits all drug policies can t deal with diseases rooted in the complex molecular diversity of human bodies Washington is ill equipped to handle the torrents of data that now propel the advance of molecular medicine and is reluctant to embrace the statistical methods of the digital age that can Obsolete economic policies often rationalized as cost saving measures stifle innovation and suppress investment in the medicine that can provide the best cures at the lowest cost In the 1980s an AIDS diagnosis was a death sentence until the FDA loosened its throttling grip and began streamlining and accelerating approval of life saving drugs The Cure in the Code shows patients doctors investors and policy makers what we must now do to capture the full life saving and cost saving potential of the revolution in molecular medicine America has to choose At stake for America is the power to lead the world in mastering the most free fecund competitive dynamic and intelligent natural resource on the planet the molecular code that spawns human life and controls our health

Making Spaces through Infrastructure Marian Burchardt,Dirk

Laak,2023-07-04 Infrastructures are fundamental means through which societies create spaces but little is known about the precise ways in which this occurs How have infrastructures animated certain understandings of space How do infrastructures stabilize or undermine the spatial formats in which we live which shape our everyday practices and which regulate access to services and resources And conversely how do spaces frame the ways infrastructural provision is organized How do existing spaces shape infrastructural development and the scope and forms of access to vital services such as transport and water In this volume historians and sociologists draw on a range of fascinating case studies and provide compelling answers to these questions Exploring among others the provision of irrigation water in nineteenth century Los Angeles the invention of airport transit zones and the infrastructural practices of homeless people in Berlin the book demonstrates how the making of spaces through infrastructure is deeply political Intent on revealing uneven geographies of provision and hierarchies of access the contributors highlight how infrastructures are products of global entanglements

Mekong Medicine Richard W. Carlson, M.D.,2022-08-01 In 1966 Dr Richard Carlson two years out of medical school embarked on a year long tour in Vietnam to treat the many forgotten victims of the war the civilians During medical school

he was introduced to the Los Angeles County General Hospital the huge institution that served LA's socially and medically deprived. When drafted he applied to work in a Vietnamese civilian hospital. His tenure at the LA hospital was the best training for what he would encounter in Vietnam. His arrival coincided with a bloody escalation of the conflict. But like many Americans he believed South Vietnam desired a democratic future and that the U.S. was helping to achieve that goal. He diligently chronicled his efforts to save lives in the Mekong delta province of Bac Lieu and detailed the stories of the AMA volunteer doctors, USAID nurses and corpsmen that he worked with to treat the local citizens many of whom were Viet Cong. He gives a glimpse of the emerging understanding of post traumatic stress disorder and his team's development of a pioneering family planning clinic. With more than 80 photographs this book relates his efforts including the competition among civilians for medical services. The facilities and equipment were primitive and the doctors' efforts were often hampered by folk remedies and superstition.

Germ Wars Melanie Armstrong, 2017-01-17 The United States government has spent billions of dollars to prepare the nation for bioterrorism despite the extremely rare occurrence of biological attacks in modern American history. *Germ Wars* argues that bioterrorism has emerged as a prominent fear in the modern age arising with the production of new forms of microbial nature and the changing practices of warfare. In the last century revolutions in biological science have made visible a vast microscopic world and in this same era we have watched the rise of a global war on terror. *Germ Wars* demonstrates that these movements did not occur separately but are instead deeply entwined. New scientific knowledge of microbes makes possible new mechanisms of war. Whether to eliminate disease or create weapons the work to harness and control germs and the history of these endeavors provide an important opportunity for investigating how biological natures shape modern life. *Germ Wars* aims to convince students and scholars as well as policymakers and activists that the ways in which bioterrorism has been produced have consequences for how people live in this world of unspecifiable risks.

78. *St. Cyprian* Dunn, Geoffrey D., 2024 This volume contains his *De mortalitate* and *Ad Demetrianum* both dealing with a Christian understanding of pandemic a topic of international interest given the Covid experience of the last few years. The former addresses concerns within the Christian community about why they are suffering as though they were being punished equally with non-Christians and the second addresses non-Christian concerns that Christian non-participation in societal religious practice was responsible for the appearance of the pandemic. There is an extensive introduction to the two works that situate them within Cyprian's literary output and within the history of pandemic. The reader is invited to take the sense of powerlessness that was experienced in the early days of Covid to appreciate afresh how threatened people must have felt in a world without the medical capacity to combat disease.

Discursive Perspectives in Therapeutic Practice Andy Lock, Tom Strong, 2012-04-05 For an endeavour that is largely based on conversation it may seem obvious to suggest that psychotherapy is discursive. After all therapists and clients primarily use talk or forms of discourse to accomplish therapeutic aims. However talk or discourse has usually been seen as secondary to the actual business of therapy a necessary conduit for

exchanging information between therapist and client but seldom more Psychotherapy primarily developed by mapping particular experiential domains in ways responsive to human intervention Only recently though has the role that discourse plays been recognized as a focus in itself for analysis and intervention Discursive Perspectives in Therapeutic Practice presents an overview of discursive perspectives in therapy along with an account of their conceptual underpinnings The book starts by setting out the case for a discursive and relational approach to therapy by juxtaposing it to the tradition that that leads to the diagnostic approach of the DSM V and medical psychiatry It then presents a thorough review of a range of innovative discursive methods each presented by an authority in their respective area The book shows how discursive therapies can help people construct a better sense of their world and move beyond the constraints caused by the cultural preconceptions opinions and values the client has about the world The book makes a unique contribution to the philosophy and psychiatry literature in examining both the philosophical bases of discursive therapy whilst also showing how discursive perspectives can be applied in real therapeutic situations The book will be of great value and interest to psychotherapists and psychiatrists wishing to understand explore and apply these innovative techniques The Martians Have Landed! Bartholomew, Benjamin Radford, 2011-11-08 History is replete with examples of media created scares and panics This book presents more than three dozen studies of media scares from the 17th century to the 21st century including hoaxes perpetrated via newspapers radio television and cyberspace From the 1835 batmen on the Moon hoax to more recent bird flu scares and Hurricane Katrina myths this book explores hoaxes that highlight the impact of the media on our lives and its tendency to sensationalize Most of the hoaxes covered occurred in the United States though incidents from Europe Asia Africa South America and Australia are featured as well Several are global in scope revealing the power global media wields

Sources of Power Manfred Weissenbacher, 2009-09-30 A landmark book rolls out a bold new energy based theory of human history based on a simple yet powerful law whoever controls the world's effective energy supplies during a given energy age will inevitably dominate the economic political and cultural history of that age The innovative theory articulated in Sources of Power How Energy Forges Human History parses history into four ages the foraging agriculture coal and oil ages each defined by the dominant source of power Manfred Weissenbacher tests this sweeping theory against the panorama of world history combining formidable powers of synthesis with a specialist's deep understanding of energy systems and technologies After proving the operation of his law through history and into the present Weissenbacher applies it to global geopolitical trends He assesses the prospects of the various candidate technologies to succeed oil and charts future scenarios based on the distribution of energy reserves Finally he forecasts the fates of the American and Chinese empires in the twilight of the oil age the United States as a mature superpower forced to deploy military might to occupy oilfields in the Middle East China as an emerging superpower forced to deploy economic might to muscle in on the development of Third World oilfields **Emerging Viral Diseases** Institute of Medicine, Board on Global Health, Forum on Microbial
