Smart Rats:

Social Psychology Catherine A. Sanderson,2009-12-02 Catherine Sanderson's Social Psychology will help open students' minds to a world beyond their own experience so that they will better understand themselves and others. Sanderson's uniquely powerful program of learning resources was built to support you in moving students from passive observers to active course participants. Go further in applying social psychology to everyday life. Sanderson includes application boxes on law, media, environment, business, health, and education in every chapter right as the relevant material is introduced rather than at the end of the book. This allows students to make an immediate connection between the concept and the relevant application and provides a streamlined 15 chapter organization that helps you cover more of the material in a term.

Teacher Expectations in Education Christine M. Rubie-Davies,2017-08-16 The influence of teacher expectations on student outcomes is routinely explored by professors, administrators, teachers, researchers, journalists, and scholars. Written by a leading expert on teacher expectations, this book situates the topic within the broader context of educational psychology research and theory and brings it to a wider audience. With chapters on the history of the teacher expectation field, student perceptions of teacher expectations, and implications for practice, this concise volume is designed for use in educational psychology courses and any education course that includes social psychological aspects of classrooms in the curriculum. It will be indispensable for student researchers and both pre- and in-service teachers alike.

The Art of Connecting Claire Raines,Lara Ewing,2006 As our workplaces and communities become more diverse in more ways, it's more important than ever to focus not on what sets us apart but on what can bring us together. Packed with refreshing perspectives and clear examples, *The Art of Connecting* shows you how. Jacket

Galen's Prophecy Jerome Kagan,2018-10-08 Nearly two thousand years ago, a physician named Galen of Pergamon suggested that much of the variation in human behavior could be explained by an individual's temperament. Since that time, inborn dispositions have fallen in and out of favor. Based on fifteen years of research, *Galen's Prophecy* now provides fresh insights into these complex questions, offering startling new evidence to support Galen's ancient classification of melancholic and sanguine adults. Integrating evidence and ideas from biology, philosophy, and psychology, Jerome Kagan examines the implications of the idea of temperament for aggressive behavior, conscience, psychopathology, and the degree to which each of us can be expected to control our deepest emotions.

Is That True? Joel Best, 2021-02-16 Across disciplines critical thinking is praised, taught and put into practice But what does it actually mean to think critically In this brief volume sociologist Joel Best examines how to evaluate arguments and the evidence used to support them as he hones in on how to think in the field of sociology and beyond With inimitable style that melds ethnographic verve with dry humor Best examines the ways in which sociologists engage in fuzzy thinking through bias faddish cultural waves spurious reasoning and implicit bias The short chapters cover A general introduction to critical thinking and logic in the social sciences Sociology as an enterprise Key issues in thinking critically about sociological research Challenging questions that confront sociologists and a call for the discipline to meet those challenges Students across disciplines will learn the building blocks of critical thinking in a sociological context and come away with key concepts to put into practice

Before the Law Cary Wolfe, 2024-05-31 Animal studies and biopolitics are two of the most dynamic areas of interdisciplinary scholarship but until now they have had little to say to each other Bringing these two emergent areas of thought into direct conversation in *Before the Law* Cary Wolfe fosters a new discussion about the status of nonhuman animals and the shared plight of humans and animals under biopolitics Wolfe argues that the human-animal distinction must be supplemented with the central distinction of biopolitics the difference between those animals that are members of a community and those that are deemed killable but not murderable From this understanding we can begin to make sense of the fact that this distinction prevails within both the human and animal domains and address such difficult issues as why we afford some animals unprecedented levels of care and recognition while subjecting others to unparalleled forms of brutality and exploitation Engaging with many major figures in biopolitical thought from Heidegger Arendt and Foucault to Agamben Esposito and Derrida Wolfe explores how biopolitics can help us understand both the ethical and political dimensions of the current questions surrounding the rights of animals

Is What They Tell Us True? Pavla Hanáčková, 2021-07-15 There are many myths and stereotypes about animals that people have believed over the years and still believe today Are bats and snakes evil creatures Are all foxes cunning and sly Are elephants really afraid of mice Readers find out the answers to these questions and many more as they explore clear and concise text that's paired with charming colorful illustrations Each chapter focuses on a different animal and the stories surrounding it from wolves to ostriches As readers learn the truth through accessible blocks of text they practice using facts to fight stereotypes and uninformed perceptions
