Jain,Roumen Kountchev,Bin Hu,Roumiana Kountcheva,2021-11-26 This book gathers selected papers presented at the 4th International Conference on Wireless Communications and Applications ICWCA 2020 held at Hainan University China The second volume will involve research works aimed at the contemporary applications emerging wireless mobile applications context and location aware wireless services wireless telemedicine and e health services intelligent transportation systems RFID technology and application cognitive radio and sensor based applications content distribution in wireless home environment and many others **e-Learning, e-Education, and Online Training** Shuai Liu,Guanglu Sun,Weina Fu,2020-12-11 This 2 volume set constitutes the proceedings of the 6th International Conference on e Learning e Education and Online Training eLEOT 2020 held in Changsha China in June 2020 The conference was held virtually due to the COVID 19 pandemic The 68 full papers presented were carefully reviewed and selected from 141 submissions They focus on most recent and innovative trends and new technologies in for educational modernization such as artificial intelligence and big data The theme of eLEOT 2020 was Education with New Generation Information Technology *Building Embodied AI Systems: The Agents, the Architecture Principles, Challenges, and Application Domains* Pethuru Raj,Alvaro Rocha,Simar Preet Singh,Pushan Kumar Dutta,B. Sundaravadivazhagan,2025-01-18 This book is primed to demystify the emerging and evolving trend of embodied systems It explains how these unique systems facilitate establishing smarter environments such as multi specialty hospitals manufacturing floors warehouses retail stores defense zones eating joints entertainment plazas etc in detail for the benefit of our esteemed readers To get a complete and actionable understanding of any mission critical environment we must deploy embodied systems These systems such as robots drones etc are physical entities that are embedded and empowered with software systems They interact with the environment in real time providing context aware services There are chapters exclusively delineating the technologies behind the realization and deployment of such enigmatic systems The prominent industrial use cases are explained in the latter chapters **Immersive Technology in Smart Cities** Sagaya Aurelia,Sara Paiva,2021-07-07 This book presents recent trends and enhancements in the convergence of immersive technology and smart cities The authors discuss various domains such as

medical education construction brain interface interactive storytelling edification and journalism in relation to combining smart cities IoT and immersive technologies The book sets up a medium to promulgate insights and in depth understanding among experts in immersive technologies IoT HCI and associated establishments The book also includes case studies survey models algorithms frameworks and implementations in storytelling smart museum medical education journalism and more Various practitioners academicians and researchers in the domain contribute to the book

Intelligent Computing on IoT 2.0, Big Data Analytics, and Block Chain Technology Mohammad S. Obaidat, Padmalaya Nayak, Niranjana K. Ray, 2024-05-23 The book is designed as a reference text and explores the concepts and techniques of IoT artificial intelligence AI and blockchain It also discusses the possibility of applying blockchain for providing security in various domains The specific highlight of this book is focused on the application of integrated technologies in enhancing data models better insights and discovery intelligent predictions smarter finance smart retail global verification transparent governance and innovative audit systems The book discusses the potential of blockchain to significantly increase data while boosting accuracy and integrity in IoT generated data and AI processed information It elucidates definitions concepts theories and assumptions involved in smart contracts and distributed ledgers related to IoT systems and AI approaches The book offers real world uses of blockchain technologies in different IoT systems and further studies its influence in supply chains and logistics the automotive industry smart homes the pharmaceutical industry agriculture and other areas It also presents readers with ways of employing blockchain in IoT and AI helping them to understand what they can and cannot do with blockchain The book is aimed primarily at advanced undergraduates and graduates studying computer science computer engineering electrical engineering information systems computational sciences artificial intelligence and information technology Researchers and professionals will also find this book very useful

Software Architecture Henry Muccini, Paris Avgeriou, Barbora Buhnova, Javier Camara, Mauro Caporuscio, Mirco Franzago, Anne Koziolk, Patrizia Scandurra, Catia Trubiani, Danny Weyns, Uwe Zdun, 2020-09-10 This book constitutes the refereed proceedings of the tracks and workshops which complemented the 14th European Conference on Software Architecture ECSA 2020 held in L'Aquila Italy in September 2020 The 30 full papers and 9 short papers presented in this volume were carefully reviewed and selected from 72 submissions Papers presented were accepted into the following tracks and workshops ECSA 2020 Doctoral Symposium track ECSA 2020 Tool Demos track ECSA 2020 Gender Diversity in Software Architecture CASA 3rd International Workshop on Context aware Autonomous and Smart Architecture CSE QUDOS Joint Workshop on Continuous Software Engineering and Quality Aware DevOps DETECT 3rd International Workshop on Modeling Verification and Testing of Dependable Critical Systems FAACS MDE4SA Joint Workshop on Formal Approaches for Advanced Computing Systems and Model Driven Engineering for Software Architecture IoT ASAP 4th International Workshop on Engineering IoT Systems Architectures Services Applications and Platforms SASI4 2nd Workshop on Systems Architectures and Solutions for Industry

4 0 WASA 6th International Workshop on Automotive System Software Architecture The conference was held virtually due to the COVID 19 pandemic Intelligent Systems and Applications Kohei Arai,2021-08-06 This book presents Proceedings of the 2021 Intelligent Systems Conference which is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world The conference attracted a total of 496 submissions from many academic pioneering researchers scientists industrial engineers and students from all around the world These submissions underwent a double blind peer review process Of the total submissions 180 submissions have been selected to be included in these proceedings As we witness exponential growth of computational intelligence in several directions and use of intelligent systems in everyday applications this book is an ideal resource for reporting latest innovations and future of AI The chapters include theory and application on all aspects of artificial intelligence from classical to intelligent scope We hope that readers find the book interesting and valuable it provides the state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research Advances in Intelligent Web Mastering Katarzyna M. Wegrzyn-Wolska,Piotr S. Szczepaniak,2007-08-08 Mastering and effective exploration of the web environment needs new ideas adaptation of known methods as well as application of sophisticated and robust technical implementations Among new research directions present in relation to Web applications a remarkable place is occupied by intelligent methods defining the topic of soft computing This edited book includes reports from the front of diverse fields of the Web application of artificial intelligence design information retrieval and interpretation user profiling security engineering etc The material has been presented at the 5th Atlantic Web Intelligence Conference AWIC 2007 held in Fontainebleau France and organized by Esigatel Technical University of Lodz and Polish Academy of Sciences *Intelligent Decision Technologies* Ireneusz Czarnowski,Robert J. Howlett,Lakhmi C. Jain,2021-07-07 This book contains selected papers from the KES IDT 2021 conference being held as a virtual conference in June 14 16 2021 The KES IDT is an interdisciplinary conference with opportunities for the presentation of new research results and discussion about them under the common title Intelligent Decision Technologies The conference has been creating for years a platform for knowledge transfer and the generation of new ideas in the field of intelligent decision making The range of topics discussed during the conference covered methods of classification prediction data analysis big data decision support knowledge engineering modeling social networks and many more in areas such as finance economy management and transportation The discussed topics covered also decision making for problems regarding the electric vehicle industry The book contains also several sections devoted to specific topics such as Advances in intelligent data processing and its applications Multi criteria decision analysis methods Knowledge engineering in large scale systems High dimensional data analysis Spatial data analysis and sparse estimation Innovative technologies and applications in computer intelligence Intelligent diagnosis and monitoring of systems Decision making theory for economics *Ambient Networks* Norbert Niebert,Andreas Schieder,Jens Zander,Robert

Hancock,2007-04-30 Ambient Networks defines a new kind of network architecture which embeds support for co operation and competition between diverse network types within a common control layer This unified networking concept can adapt to the heterogeneous environments of different radio technologies and service and network environments Special focus is placed on facilitating both competition and co operation of various market players by defining interfaces which allow the instant negotiation of cooperation agreements The Ambient Networking concept has been developed in the framework of the Ambient Networks project which is co sponsored by the European Union under the Information Society Technology IST priority of the 6th Framework Programme The Ambient Networks project mobilised the work of researchers from over forty different organisations both major industrial corporations and leading academic institutions from Europe and worldwide This book offers a complete and detailed overview of the Ambient Networking concept and its core technologies The authors explain the problems with current mobile IP networks and the need for a new mobility aware IP based control architecture before presenting the Ambient Networking concept itself and the business opportunities that it offers The architecture components features and challenges of Ambient Networking are covered in depth with comprehensive discussions of multi radio access generic Ambient Network signalling mobility support context and network management and built in media delivery overlay control Ambient Networks Co operative Mobile Networking for the Wireless World Explains the need for Ambient Networking discussing the limitations of today s proposed architectures and explaining the business potential of edge networks and network co operation Describes Ambient Networking technology in detail and addresses the technical challenges for implementation Includes practical user scenarios which are fully analysed and assessed through simulation studies Including a complete examination of the research and technologies arising from the Ambient Networks concept Ambient Networks will be invaluable for research and development teams in networking and communications technology as well as advanced students in electrical engineering and computer science faculties Standardisation specialists research departments and telecommunications analysts will also find this a helpful resource **Design and Nature VI S.**

Hernandez,C. A. Brebbia,2012 Throughout history many leading thinkers have been inspired by the parallels between nature and human design in mathematics engineering and other areas Today the huge increase in biological knowledge developments in design engineering systems together with the growth in computer power and developments in simulation modelling have all made possible more comprehensive studies of nature Conference topics include the following Mechanics in nature Nature and architecture Natural materials and processes Solutions from nature Biomimetics and bio inspiration Biocapacity Education in design and nature Competition in nature Biological engineering Constructional theory Locomotion in nature Gravitational biology Self sustaining environments It is these developments which have prompted the reconvening of this international conference on Design and Nature It is intended that the meeting will bring together researchers from around the world working on a variety of studies involving nature and their significance for modern scientific thought and

design **When Brains Meet Buildings** Michael A. Arbib, 2021 Michael Arbib presents *When Brains Meet Buildings* as an invitation to the science behind architecture richly illustrated with buildings both famous and domestic As he converses with the reader he presents action oriented perception memory and imagination as well as atmosphere aesthetics and emotion as keys to analyzing the experience and design of architecture **The 1st International Conference on Net-Zero Built Environment** Mahdi Kioumars, Behrouz Shafei, 2025-01-08 This open access book provides the latest fundamental and practical advances in reducing the built environment's carbon footprint based on a collection of papers presented at the 1st International Conference on Net Zero Built Environment Innovations in Materials Structures and Management Practices held June 19-21 2024 in Oslo Norway The volume presents research investigations and case studies spanning five interrelated domains New materials and material preparation processes for zero or negative carbon footprint Robotic construction technologies for minimum formwork and on site activities Novel structural designs and details for optimal performance with the least material usage Advanced condition assessment and health monitoring methods for the longest service life Innovative life cycle analysis and policy making strategies for effective civil infrastructure management Natural Gas Maryam Takht Ravanchi, 2022-06-28 Natural gas as a non renewable hydrocarbon is used as an energy source for cooking heating vehicle fuel and electricity generation It is also used as a chemical feedstock in the manufacturing of plastics and organic chemicals This book brings together new perspectives and future developments in natural gas Chapters address such topics as adsorbed natural gas fermentation processes for producing value added products from natural gas processes for separating C3 hydrocarbon from natural gas natural gas dehydration and much more **Technological and Industrial Applications Associated with Intelligent Logistics** Alberto Ochoa-Zezzatti, Diego Oliva, Angel Juan Perez, 2021-09-08 This book helps the reader to identify how different organizations in the context of diverse societies deploy their resources and leverage their capabilities to achieve better performance of its various labor skills marketing social responsibility and management capacity Intelligent Logistics is a complex phenomenon that has become critical for companies to reach their development locally and internationally On the one hand macro factors and market structure influence in business competitiveness but also in a regional or sector context The internal aspects and the use of various business tools contribute to the ability to create value in an organization It is of utmost importance to understand the relevance of crucial aspects in the technological future that should be known and implemented by the Z generation of its incidence in the use of organizational models linked to artificial intelligence Every innovative aspect in the use of new technologies for the distribution of goods and services will be crucial in a globalized world An avant garde society will require improved decision making regarding Logistics 4.0 and its implementation in our lives respecting the environment and being sustainable together with invaluable principles of generating tacit knowledge for future generations

When people should go to the books stores, search creation by shop, shelf by shelf, it is in reality problematic. This is why we provide the book compilations in this website. It will utterly ease you to look guide **Smart Architecture** as you such as.

By searching the title, publisher, or authors of guide you in reality want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best area within net connections. If you strive for to download and install the Smart Architecture, it is no question simple then, previously currently we extend the belong to to purchase and create bargains to download and install Smart Architecture in view of that simple!
