Smelly Science Fair Projects Leah M. Rybolt, Dr. Thomas R. Rybolt, 2015-07-15 Your sense of smell plays a huge role in how you taste what you remember what attracts you and what repels you Through photos diagrams and hands on experiments you ll discover how to find out your odor threshold conduct a jelly bean smell and taste test and learn what makes those feet so stinky Stinky Science Edward Kay, 2019-04-02 Who knew science could be so smelly This innovative book is a complete exploration of the olfactory system with a side of gross out hilarity First it tackles the basics from why things stink to how our sense of smell works hint it has to do with the six million scent receptors way up inside our noses Then it moves on to some specifics such as the link between smells and memories some of the stinkiest stinks on Earth the chemicals smells are made of and more The eww on every page is sure to hold every young scientist s attention

Headwords. Stinky Secrets of Your Noses, Ears, Mouth and Mind Pasquale De Marco, Headwords Stinky Secrets of Your Noses Ears Mouth and Mind is a hilarious and informative exploration of the grossest things about the human body From the noises your stomach makes to the way your nose runs when you have a cold there s a whole world of grossness going on inside you that you may not even be aware of This book takes you on a journey through the human body exploring all the weird wacky and downright disgusting things that happen inside it You ll learn about the science behind boogers the truth about earwax and the grossest things people put in their mouths You ll also explore the mysteries of the brain the senses and the future of medicine Along the way you ll meet some fascinating characters like the man who ate his own leg and the woman who gave birth to a baby with two heads You ll also learn about some of the most disgusting diseases and conditions that can affect the human body like elephantiasis and necrotizing fasciitis Headwords is perfect for anyone who loves science humor or just plain old gross stuff It s also a great way to learn about the human body in a fun and engaging way So what are you waiting for Dive in and explore the grossest things about the human body today Here s a sneak peek at some of the things you ll learn in this book The truth about boogers Are they really just dried mucus The science behind earwax Why do we have it and what happens if we don t clean it out The grossest things people put in their mouths You won t believe some of the things people have swallowed The mysteries of the brain What makes us who we are and what happens when things go wrong The future of medicine What new and exciting ways will we be treating diseases in the future Headwords is a book that will make you laugh cringe and learn all at the same time It s a must read for anyone who loves the human body in all its gross glory If you like this book write a review **Affective Sciences through the Chemical Senses** Géraldine Coppin, Valentina Parma, Bettina M. Pause, 2017-01-13 In people s minds smells flavors and affective phenomena are perceived as closely linked But is it genuinely the case The scientific study of this question is a rapidly expanding field both in healthy and in clinical populations Although still under studied in comparison to other sensory modalities chemical senses have proven to bring unique knowledge in the understanding of affective phenomena In this context this Research Topic is

aimed to offer a snapshot of the present knowledge and questions raised in this field Topics include but are not limited to affects elicited by odors and or flavors in different individuals contexts or cultures emotional potency of odors in guiding human behavior and cognition e g attention memory formation decisions and choices withdrawal and approach behavior affects communicated by body odors affect regulation disorders and chemosensory perception Studies on the biological underpinnings of these effects are also included The Multisensory Museum Nina Levent,Alvaro Pascual-Leone,2014-03-06 Recent research in the cognitive sciences gives us a new perspective on the cognitive and sensory landscape In The Multisensory Museum Cross Disciplinary Perspectives on Touch Sound Smell Memory and Space museum expert Nina Levent and Alvaro Pascual Leone professor of neurology at Harvard Medical School bring together scholars and museum practitioners from around the world to highlight new trends and untapped opportunities for using such modalities as scent sound and touch in museums to offer more immersive experiences and diverse sensory engagement for visually and otherwise impaired patrons Visitor studies describe how different personal and group identities color our cultural consumption and might serve as a compass on museum journeys Psychologists and educators look at the creation of memories through different types of sensory engagement with objects and how these memories in turn affect our next cultural experience An anthropological perspective on the history of our multisensory engagement with ritual and art objects especially in cultures that did not privilege sight over other senses allows us a glimpse of what museums might become in the future Education researchers discover museums as unique educational playgrounds that allow for a variety of learning styles active and passive exploration and participatory learning Designers and architects suggest a framework for thinking about design solutions for a museum environment that invites an intuitive multisensory and flexible exploration as well as minimizes physical hurdles While attention has been paid to accessibility for the physically impaired since passage of the Americans with Disabilities Act making buildings accessible is only the first small step in elevating museums to be centers of learning and culture for all members of their communities This landmark book will help all museums go much further

William Lycan on Mind, Meaning, and Method Mitchell Green,Jan G. Michel,2024-12-22 William Lycan is an internationally renowned American philosopher whose work since the late 1960s has been not only extensive but also influential particularly in the areas of philosophy of mind epistemology philosophy of language metaphysics and more recently metaphilosophy This contributed volume features high quality contributions by prominent or up and coming philosophers who critically examine many aspects of Lycan s work it also contains an essay by Lycan responding to these contributions In this way not only is the importance of William Lycan s work appreciated it is also made accessible for further research The book is also suitable for teaching purposes at universities Smelling to Survive Bill S. Hansson,2024-08-13 Smell is arguably the least understood sense yet it has always been a vital component of the human experience and that of all living creatures Smell has been used by plants and animals for millions of years to warn to attract to identify to navigate and

even to mislead Smelling to Survive explains some of these fascinating processes and explores how the past would have smelt quite different to our ancestors and how future technologies will further change the world of scents Along the way leading scientist Bill S Hansson recounts amazing stories from the world of olfactory research from the tobacco plant that excretes an alarm odour to mosquitos that cherish the smell of sweaty feet to lilies that imitate the fragrance of a dead horse Hansson explains why scientists are interested in the smell that surrounds teenage males and how climate change affects the smell of our environment He describes research trips to Christmas Island where crabs with particularly keen noses crack coconuts on the beach and outlines studies that reveal how penguins recognize their partner by their scent Born in Sweden the neuroethologist Bill S Hansson served as Vice President of the Max Planck Society and is currently Director of the Max Planck Institute for Chemical Ecology in Jena Germany and an honorary professor at Friedrich Schiller University His research centres on the question of how plants and insects communicate through scent

The Sensational Past: How the Enlightenment Changed the Way We Use Our Senses Carolyn Purnell, 2017-02-07 Sight smell hearing taste and touch as they were celebrated during the Enlightenment and as they are perceived today Blindfolding children from birth Playing a piano made of live cats Using tobacco to cure drowning Wearing flea colored clothes These actions may seem odd to us but in the eighteenth century they made perfect sense As often as we use our senses we rarely stop to think about their place in history But perception is not dependent on the body alone Carolyn Purnell persuasively shows that while our bodies may not change dramatically the way we think about the senses and put them to use has been rather different over the ages Journeying through the past three hundred years Purnell explores how people used their senses in ways that might shock us now And perhaps more surprisingly she shows how many of our own ways of life are a legacy of this earlier time The Sensational Past focuses on the ways in which small peculiar and seemingly unimportant facts open up new ways of thinking about the past You will explore the sensory worlds of the Enlightenment learning how people in the past used their senses understood their bodies and experienced the rapidly shifting world around them In this smart and witty work Purnell reminds us of the value of daily life and the power of the smallest aspects of existence using culinary history fashion medicine music and many other aspects of Enlightenment life

Cognition Gesualdo M Zucco, Benoist Schaal, Mats Olsson, Ilona Croy, 2014-12-02 Foreword by Richard J Stevenson Macquarie University Australia It was long thought that the human nose might be able to discriminate somewhere in the order of 10 000 different odourants The recent finding that the human nose can discriminate something like a trillion different smells serves as yet another reminder that we have again underestimated the capacity of our sense of smell Bushdid Magnasco Vosshall Keller 2014 This volume serves as a further corrective for anyone who should hold the view that olfaction is unimportant in human affairs The papers presented in this ebook carefully collated and overseen by Aldo Zucco Benoist Schaal Mats Olsson and Ilona Croy showcase a large number of quite different reasons for studying the applied side of olfaction and indeed human olfaction in general The 23 contributions presented here cover a broad range of topics which illustrate contemporary interests in our field Although with a strong applied focus a noteworthy feature of this ebook is the richness of the theoretical perspectives that are developed These range from considerations of olfactory perception memory expertise and priming right the way through to receptor genetics These contributions from many leading experts in the field will surely shape much of the applied work linking olfaction to disease which is a further focus of this ebook In respect to health and disease the chapters on aging pregnancy depression alcohol dependency and environmental odours present overviews and rich new data on many contemporary problems to which the study of olfaction is now contributing A particularly notable aspect of olfactory experience is the affective impact that odours can have on people and their lives The ebook covers some particularly intriguing aspects of work in this area with empirical studies investigating dissociations between wanting and liking stress reduction in the elderly mother infant bonding and the emotions that different odourants can evoke This affective line of work is nicely complemented by empirical studies on expertise the effect of odours on visual attention and the relationship between particular personality traits and interest in olfaction The gradual appropriation of methods from cognitive neuroscience into olfaction is also nicely represented in this ebook with at least three of the chapters

reporting data using neuroimaging including a particular intriguing study looking at recognition of odours in mixtures Finally the close links between olfactory perception and sensory evaluation are also reflected in a chapter on wine I hope that readers of this e book will be struck as I have been in reading its various chapters how much olfaction affects our lives and how the study of this sense can enrich it References Bushdid C Magnasco M Vosshall L Keller A 2014 Humans can discriminate more than 1 trillion olfactory stimuli Science 343 1370 1372 *A Dictionary of Terms Used in Medicine and the Collateral Sciences* Richard Dennis Hoblyn, 1887 **The Best of Uncle John's Bathroom Reader** Bathroom Readers' Institute, 2012-11-01 Find out what millions of trivia lovers already know Uncle John is your 1 source when it comes to throne room reading entertainment This book celebrates the very best articles from the BRI's first ten years plus 150 all new pages As always the contents are divided by length short articles for the reader on the go medium articles if you have a few minutes to spare and the extended sitting section for those truly leg numbing experiences Read about The origin of Twinkies Who invented the Hula Hoop The untold history of the Three Stooges Space toilets where no man has gone before 1876 the year they stole the presidency The FBI's Ten Most Wanted list How to start your own country Celebrity imposters And much much more
