Page, 2013-10-22 This is the first volume in the new COSPAR Colloquia series which will provide a forum for an in depth discussion on selective topics of importance to the international community The International Heliospheric Study IHS was initially approved by COSPAR in 1982 when it was anticipated that the study would centre on the ESA NASA Ulysses spacecraft This mission was delayed until October 1990 but it was decided to commence the study in 1986 in order to exploit the existence of the Pioneer 10 and 11 and the Voyager 1 and 2 spacecraft in the outer heliosphere The primary purpose of Physics of the Outer Heliosphere is to study the three dimensional structure of the solar wind and interplanetary magnetic field carried by it the propagation of energetic solar particles throughout the heliosphere and the modulation of galactic cosmic rays by the heliosphere This volume provides information for scientists interested in spectroscopic studies of the local interstellar medium galactic and solar cosmic ray populations in the outer heliosphere and also plasma and magnetic field aspects of the distant solar wind

Cosmic Winds and the Heliosphere J. R. Jokipii, C. P. Sonett, Mark S. Giampapa, 2018-01-30 Until the advent of space physics astrophysical plasmas could be studied only using ground based observations Although observational methods have advanced over recent decades the merging of heliospheric physics with astrophysics is far from complete due to the vastly different techniques employed by astronomers and space physicists That astrophysical plasmas can be studies directly is a major advance in astrophysical research The solar wind from the Sun is only one of many examples of solar winds but it provides scientists with a basis for understanding how these formerly disparate disciplines are related Cosmic Winds and the Heliosphere is a comprehensive sourcebook on conceptually correlated topics in astrophysical winds and heliospheric physics The contributors review the various kinds of winds such as solar wind winds of cataclysmic variables and winds from pulsating stars They then examine the physics of wind origin and physical phenomena in winds including heliospheric shocks magnetohydrodynamic turbulence and kinetic phenomena A final section considers interactions with surrounding media with contributions ranging from studies of the interstellar cloud surrounding the solar system to considerations of solar wind interaction with comets Prepared to the scrupulous standards of the University of Arizona Space Science Series Cosmic Winds and the Heliosphere is an essential volume for astronomers and space physicists
