Murti, 1992 Tobacco use is widely recognized as the most important preventable cause of death and disease in the world today In most countries its use is synonymous with cigarette smoking but in some tobacco is more frequently used in other forms The health consequences of cigarette smoking and other forms of tobacco use encompass a wide spectrum of diseases including cancers of the mouth larynx lung pharynx and oesophagus diseases of the heart circulatory system and lungs and if used during pregnancy adverse effects on the foetus Even second hand passive smoking is shown to cause and influence the risks of diseases Tobacco control in any country however is not simply a health problem It has major implications for economics agriculture law and individual and social behaviour Therefore tobacco control must involve a multidimensional multidisciplinary approach In this volume the issue of tobacco control is addressed from many points of view by leading international experts in clinical medicine public health biostatistics and behavioural sciences agriculture law and policy analysis The articles provide an in depth overview of the various topics central to the theme of tobacco control This constitutes a valuable resource work on a subject of increasing concern containing state of the art reviews original research papers and thought provoking articles *Smoking and Health in the Americas*, 1992 Ashes to Ashes Richard Kluger, 2010-05-26 PULITZER PRIZE WINNER No book before this one has rendered the story of cigarettes mankind's most common self destructive instrument and its most profitable consumer product with such sweep and enlivening detail A great battleship of a book formidable majestic The New York Times Book Review Here for the first time in a story full of the complexities and contradictions of human nature all the strands of the historical process financial social psychological medical political and legal are woven together in a riveting narrative The key characters are the top corporate

executives public health investigators and antismoking activists who have clashed ever more stridently as Americans debate whether smoking should be closely regulated as a major health menace We see tobacco spread rapidly from its aboriginal sources in the New World 500 years ago as it becomes increasingly viewed by some as sinful and some as alluring and by government as a windfall source of tax revenue With the arrival of the cigarette in the late nineteenth century smoking changes from a luxury and occasional pastime to an everyday to some indispensable habit aided markedly by the exuberance of the tobacco huskers This free enterprise success saga grows shadowed from the middle of this century as science begins to understand the cigarette s toxicity Ironically the more detailed and persuasive the findings by medical investigators the more cigarette makers prosper by seeming to modify their product with filters and reduced dosages of tar and nicotine We see the tobacco manufacturers come under intensifying assault as a rogue industry for knowingly and callously plying their hazardous wares while insisting that the health charges against them a remain unproven and b are universally understood so smokers indulge at their own risk Among the eye opening disclosures here outrageous pseudo scientific claims made for cigarettes throughout the 30s and 40s and the story of how the tobacco industry and the National Cancer Institute spent millions to develop a safer cigarette that was never brought to market Dealing with an emotional subject that has generated more heat than light this book is a dispassionate tour de force that examines the nature of the companies culpability the complicity of society as a whole and the shaky moral ground claimed by smokers who are now demanding recompense
