God and Reason in the Middle Ages Edward Grant,2001-07-30 Between 1100 and 1600 the emphasis on reason in the learning and intellectual life of Western Europe became more pervasive and widespread than ever before in the history of human civilization Of crucial significance was the invention of the university around 1200 within which reason was institutionalized and where it became a deeply embedded permanent feature of Western thought and culture It is therefore appropriate to speak of an Age of Reason in the Middle Ages and to view it as a forerunner and herald of the Age of Reason that was to come in the seventeenth century The object of this study is twofold to describe how reason was manifested in the curriculum of medieval universities especially in the subjects of logic natural philosophy and theology and to explain how the Middle Ages acquired an undeserved reputation as an age of superstition barbarism and unreason *Sophisms on meaning*

*and truth*, tr Jean Buridan, **Sophisms on Meaning and Truth** Buridanus Johannes,1966 **Contemporary Research in Philosophical Logic and Linguistic Semantics** D.J. Hockney,W.L. Harper,B. Freed,2012-12-06 In 1973 a workshop was held at The University of Western Ontario on topics of common interest to philosophers and linguists This volume contains most of the papers presented at the workshop Also included are previously unpublished essays by R Dougherty and H Lasnik as well as a comment on G Lakoff's paper by B van Fraassen K Donnellan's paper was presented at the workshop and subsequently appeared in The Philosophical Review We thank the editors of this journal for permission to publish the paper here The papers by D Lewis R Stalnaker G Lakoff B Partee and H Herzberger appeared earlier in Journal of Philosophical Logic by arrangement of the editors with B van Fraassen and D Reidel Publishing Company The editors thank the officers of The University of Western Ontario for making the workshop possible and Pauline Campbell for making the workshop work THE EDITORS DAVID LEWIS COUNTERFACTUALS AND COMPARATIVE POSSIBILITY In the last dozen years or so our understanding of modality has been much improved by means of possible world semantics the project of analyzing modal language by systematically specifying the conditions under which a modal sentence is true at a possible world I hope to do the same for counterfactual conditionals I write  $A \rightarrow C$  for the counterfactual conditional with antecedent A and consequent C It may be read as H it were the case that A then it would be the case that C or some more idiomatic paraphrase thereof

*The Logical Renaissance* Katrin Ettenhuber,2024-01-04 This book charts for the first time the deep relationship between Renaissance literature and logic Ettenhuber shows how the study of logic creatively inspired writers in the art of argument and reasoning and offered frameworks for the discovery of literary material and advice on how to synthesise and present it

*Handbook of Epistemology* I. Niiniluoto,Matti Sintonen,Jan Wolenski,2004-03-31 Epistemology or theory of knowledge has always been one of the most important if not the most important field of philosophy New arguments are constantly brought to bear on old views new variants are marshalled to revive ancient stands new concepts and distinctions increase the

sophistication of epistemological theories There are a great many excellent textbooks monographs as well as anthologies consisting of articles in epistemology Similarly there are useful philosophical dictionaries which contain a great number of relatively short entries and general philosophical handbooks which also touch epistemological issues This volume of 27 essays grew out from the interest to see a handbook which is devoted entirely to the historical roots and systematic development of theory of knowledge It is not intended to compete but to supplement the already existing literature It aims at giving both beginners and more advanced students as well as professionals in epistemology and other areas of philosophy an overview of the central problems and solutions of epistemology The essays are self contained and still often rather extensive discussions of the chosen aspects of knowledge The contributions presuppose very little familiarity with previous literature and only a few of them require the mastery of even elementary logical notation This we hope makes the volume also accessible to the philosophically interested wider audience The contributors were asked to provide substantial up to date self contained and balanced surveys of the various subareas and more specific topics of epistemology with reference to literature

**The Philosophy of Language** A. Borgmann, 2012-12-06 This book deals with the philosophy of language and with what is at issue in the philosophy of language Due to its intensity and diversity the philosophy of language has attained the position of first philosophy in this century To show this is the task of Part Two But the task can be accomplished only if it is first made clear how language came to be a problem in and for philosophy and how this development has influenced and has failed to influence our understanding of language This is done in Part One What is at issue in the philosophy of language today is the question regarding the source of meaning More precisely the question is whether we have access to such a source Again Part One presents the necessary foil for Part Two in showing how meaning was thought to originate in Western history and how the rise of the philosophy of language and the eclipse of the origin of meaning occurred jointly Today the question of meaning has come to a peculiarly elaborate and fruitful issue in the philosophy of language and the fate of the philosophy of language is bound up with the future possibilities of meaning Epistemic Logic in the Later Middle Ages Ivan Boh, 2005-09-27 Epistemic Logic studies statements containing verbs such as know and wish It is one of the most exciting areas in medieval philosophy Neglected almost entirely after the end of the Middle Ages it has been rediscovered by philosophers of the present century This is the first comprehensive study of the subject Ivan Boh explores the rules for entailment between epistemic statements the search for the conditions of knowing contingent propositions the problems of substitutivity in intentional contexts the relationship between epistemic and modal logic and the problems of composite and divided senses in authors ranging from Abelard to Franchantian

web jun 2 2017 circles in the coordinate plane recall that a circle is the set of all points in a plane that are the same distance from the center this definition can be used to find an equation of a circle in the coordinate plane let's start with the circle centered at 0 0 if  $(x, y)$  is a point on the circle then the distance from the center to this point
