

Then a woman said, "Speak to us of Joy and Sorrow."

And he answered:

Your joy is your sorrow unmasked.

And the selfsame well from which your laughter rises was oftentimes filled with your tears
And how else can it be?

The deeper that sorrow carves into your being, the more joy you can contain.

Is not the cup that hold your wine the very cup that was burned in the potter's oven?

And is not the lute that soothes your spirit, the very wood that was hollowed with knives?

When you are joyous, look deep into your heart and you shall find it is
only that which has given you sorrow that is giving you joy.

When you are sorrowful look again in your heart, and you shall see that
in truth you are weeping for that which has been your delight.

Some of you say, "Joy is greater than sorrow," and others say, "Nay, sorrow is the greater."
But I say unto you, they are inseparable.

Together they come, and when one sits alone with you at your board,
remember that the other is asleep upon your bed.

Verily you are suspended like scales between your sorrow and your joy.

Only when you are empty are you at standstill and balanced.

When the treasure-keeper lifts you to weigh his gold and his silver,
needs must your joy or your sorrow rise or fall.

Joy Steve Dunn Hanson,1992 Traditional Chinese Philosophy and the Paradigm of Structure (Li Qi) Jana S. Rošker,2013-01-04 Specific Chinese models for theories of knowledge were premised upon a structurally ordered external reality since natural or cosmic order is organic it naturally follows the flow of structural patterns and operates in accordance with structural principles that regulate every existence In this worldview our mind is also structured in accordance with this all embracing but open organic system The axioms of our recognition and thought are therefore not arbitrary but follow this rationally designed structure The compatibility of both the cosmic and mental structures is the basic precondition that enables humans to perceive and recognize external reality The present study shows that this paradigm of structural epistemology can already be found in the earliest Chinese theories of knowledge The introduction of Chinese models and their incorporation into Western discourses fills an important theoretical gap in the Western model of structuralism This book offers an insight into epistemological systems that arose outside the discourses of the Euro American tradition It can thus help us to eliminate and supersede certain culturally conditioned prejudices as to the superiority and omnipresence of Western theoretical models while demonstrating incontrovertibly that the results of Western discourses are by no means the only force driving theoretical innovation at the present time
