Soul And Form:

The Soul and Its Instrumental Body A. P. Bos, 2003-01-01 Aristotle's definition of the soul should be interpreted as the soul is the entelechy of a natural body that serves as its instrument. The theory of a fine corporeal body makes it much easier to understand Aristotle's position between Plato and the Stoics. This correction puts paid to all theories about a development in Aristotle's thought. *Nutrition and Nutritive Soul in Aristotle and Aristotelianism* Giouli Korobili, Roberto Lo Presti, 2020-12-07 This volume is a detailed study of the concept of the nutritive capacity of the soul and its actual manifestation in living bodies: plants, animals, humans. In Aristotle and Aristotelianism, Aristotle's innovative analysis of the nutritive faculty has laid the intellectual foundation for the increasing appreciation of nutrition as a prerequisite for the maintenance of life and health that can be observed in the history of Greek thought. According to Aristotle, apart from nutrition, the nutritive part of the soul is also responsible for or interacts with many other bodily functions or mechanisms, such as digestion, growth, reproduction, sleep, and the innate heat. After Aristotle, these concepts were used and further developed by a great number of Peripatetic philosophers, commentators on Aristotle, and Arabic thinkers until early modern times. This volume is the first of its kind to provide an in-depth survey of the development of this rather philosophical concept from Aristotle to early modern thinkers. It is of key interest to scholars working on classical, medieval, and early modern psycho-physiological accounts of living things, historians and philosophers of science, biologists with interests in the history of science, and generally students of the history of philosophy and science. *The Mathematical Soul* Ryszard Stachowski, 1992

One and Many Jiayan Zhang, 2011-11-30 Is the world one or many? Ji Zhang revisits this ancient philosophical question from the modern perspective of comparative studies. His investigation stages an intellectual exchange between Plato, founder of the Academy, and Ge Hong, who systematized Daoist belief and praxis. Zhang not only captures the tension between rational Platonism and abstruse Daoism but also creates a bridge between the two. **The Soul of Theological Anthropology** Joshua R. Farris, 2016-11-25 Recent research in the philosophy of religion, anthropology, and philosophy of mind has prompted the need for a more integrated, comprehensive, and systematic theology of human nature. This project constructively develops a theological accounting of human persons by drawing from a Cartesian as a term of art model of anthropology, which is motivated by a long tradition. As was common among patristics, medievals, and Reformed Scholastics, Farris draws from philosophical resources to articulate Christian doctrine as he approaches theological anthropology. Exploring a substance dualism model, the author highlights relevant theological texts and passages of Scripture, arguing that this model accounts for doctrinal essentials concerning theological anthropology. While Farris is not explicitly interested in thorough critique of materialist ontology, he notes some of the significant problems associated with it. Rather, the present project is an attempt to revitalize the resources found in Cartesianism by responding to some common worries associated with it. **History of the Concept of Mind** Paul S. Macdonald, 2017-09-29 In the 20th century, theorists of mind were almost exclusively concerned

with various versions of the materialist thesis but prior to current debates accounts of soul and mind reveal an extraordinary richness and complexity which bear careful and impartial investigation This book is the first single authored comprehensive work to examine the historical linguistic and conceptual issues involved in exploring the basic features of the human mind from its most remote origins to the beginning of the modern period MacDonald traces the development of an armature of psychical concepts from the Old Testament and Homer's works to the 18th century advocacy of an empirical science of the mind Along the way detailed attention is paid to the Presocratics Plato Aristotle the Stoics and Epicurus before turning to look at the New Testament Neoplatonism Augustine Medieval Islam Aquinas and Dante Treatment of Renaissance theories is followed by an unusual perhaps unique chapter on the words soul and mind in English literature from Chaucer to Shakespeare the story then rejoins the mainstream with analyses of Descartes Spinoza Leibniz Hobbes Locke Berkeley and Hume Chapter focused bibliographies

Method, Structure, and Development in Al-Farabi's Cosmology Damien Janos, 2012-03-02 This study analyzes key concepts in al Farabi's cosmology and provides a new interpretation of his philosophical development through an analysis of the Greco Arabic sources and a contextualization of his life and thought in the cultural and intellectual milieu of his time

The Soul-body Problem at Paris Ca. 1200-1250 Magdalena Bieniak, 2010 The soul body problem was among the most controversial issues discussed in thirteenth century Europe and it continues to capture much attention today as the quest to understand human identity becomes more and more urgent What made the discussion about this problem particularly interesting in the scholastic period was the tension between the traditional dualist doctrines and a growing need to affirm the unity of the human being This debate is frequently interpreted as a conflict between the new philosophy conveyed by the rediscovered works of Aristotle and his followers and doctrinal requirements especially the belief in the soul's immortality However a thorough examination of Parisian texts written between approximately 1150 and 1260 leads to surprising conclusions In *The Soul Body Problem at Paris ca 1200 1250* the study and edition of some little known texts of Hugh of St Cher and his contemporaries ranging from Gilbert of Poitiers to Thomas Aquinas reveals an extremely rich and colorful picture of the Parisian anthropological debate of the time This book also offers an opportunity to reconsider some received views concerning medieval philosophy such as the conviction that the notion of person did not play any major role in the anthropological controversies

From Platonism to Neoplatonism Fr. Merlan, 2012-12-06 The first edition of this book appeared in 1953 the second revised and enlarged in 1960 The present third edition is essentially a reprint of the second except for the correction of a few misprints and the following remarks which refer to some recent publications and replace the brief preface to the second edition Neither Eudemus nor Theophrastus so I said p 208 knew a branch of theoretical philosophy the object of which would be something called 0 1 0 1 and which branch would be distinct from theology And there is no sign that they found such a branch corresponding to what was later called *metaphysica generalis* in Aristotle To the names of Eudemus and Theophrastus we now can add that of Nicholas of Damascus

In 1965 H J Drossaart Lulofs published *Nicolaus Damascenus On the Philosophy of Aristotle* Leiden Brill. The fragments of his work preserved in Syriac together with an English translation. In these fragments we find a competent presentation of Aristotle's theoretical philosophy in systematic form. Nicholas subdivides Aristotle's theoretical philosophy into theology, physics and mathematics and seems to be completely unaware of any additional branch of philosophy the object of which would be distinct from theology with its object the divine. *Anna Seghers* Helen Fehervary, 2001. A fascinating study of one of the greatest German woman writers of the twentieth century.
