The Sound Shape of Language Roman Jakobson, Linda R. Waugh, 2020-05-18 No detailed description available for The Sound Shape of Language **The Sound Shape of language. By Roman Jakobson & Linda (R.) Waugh. Assisted by Martha Taylor. [Mit Fig.] (1. publ. in Great Britain.)** Roman Jakobson, Linda R Waugh, 1979 The Sound Shape of Language Roman Jakobson, Linda R. Waugh, 1979 **Sound-Emotion Interaction in Poetry** Reuven Tsur, Chen Gafni, 2022-06-03 This book is a collection of studies providing a unique view on two central aspects of poetry sounds and emotive qualities with emphasis on their interactions The book addresses various theoretical and methodological issues related to topics like sound symbolism poetic prosody and voice quality in recited poetry The authors examine how these sound related phenomena contribute to the generation of emotive qualities and how these qualities are perceived by readers and listeners The book builds upon Reuven Tsur's theoretical research and supplements it from an experimental angle It also engages in methodological debates with prevalent scientific approaches In particular it emphasises the importance of proper theory in empirical literary studies and the role of the personal traits of the reader in literary analysis The intended readership of this book consists mainly of literary scholars but it might also appeal to researchers from disciplines such as linguistics psychology and brain science **Ideophones** F. K. Erhard Voeltz, Christa Kilian-Hatz, 2001-12-19 The present volume represents a selection of papers presented at the International Symposium on Ideophones held in January 1999 in St Augustin Germany They center around the following hypotheses Ideophones are universal and constitute a grammatical category in all languages of the world ideophones and similar words have a special dramaturgic function that differs from all other word classes they simulate an event an emotion a perception through language In addition to this unique function a good number of formal parallels can be observed The languages dealt with here display strikingly similar patterns of derivational processes involving ideophones An equally widespread common feature is the introduction of ideophones via a verbum dicendi or complementizer Another observation concerns the sound symbolic behavior of ideophones Thus the word formation of ideophones differs from other words in their tendency for iconicity and sound symbolism Finally it is made clear that ideophones are part of spoken language the language register where gestures are used rather than written language Bodies and Artefacts: Historical Materialism as Corporeal Semiotics (2 vols.) Joseph Fracchia, 2021-12-20 In a seemingly offhand often overlooked comment Karl Marx deemed human corporeal organisation the first fact of human history Following Marx's corporeal turn and pursuing the radical implications of his corporeal insight this book undertakes a reconstruction of the corporeal foundations of historical materialism Part I exposes the corporeal roots of Marx's materialist conception of history and historical materialist Wissenschaft Part II attempts a historical materialist mapping of human corporeal organisation Suggesting how to approach human histories up from their corporeal foundations Part III elaborates historical materialism as corporeal semiotics Part IV a case study of Marx's critique of capitalist socio economic and cultural forms

reveals the corporeal foundations of that critique and the corporeal depth of his vision of human freedom and dignity
