

Summer River

Laurie Burnham, Geoffrey H. Nash

Summer River:

Summer River Rick Kantola, 2011-03-01 The fictional Summer River flows through the remote southeast corner of Summer County in Northern California. In addition to an illegal commune assembled on a mining claim on the river, the region is home to an aging cattle rancher, an aspiring wine grape grower, a marijuana grower, and an elder of the New Life Assembly with a spirited teenaged daughter. Still suffering the pain and anger of a broken marriage, Karen Mitchell moves with her five-year-old daughter into a friend's cabin on the south bank of the river. Rick Kantola is a wonderful writer. Great descriptive powers, pleasing line and paragraph rhythms, and a wonderful ear for dialogue. Todd Walton, author *Inside Moves* and *Ruby and Spear*, a gifted writer with a strong moral angle, a capacity for creating memorable characters, and a deep and lovely sense of landscape. Tim Farrington, author *The California Book of the Dead*. **Rivers** Laurie Burnham, Geoffrey H. Nash, 2007 Presents an introduction to rivers describing how they were formed and how they have changed over time and provides the history and description of ten of the world's most famous rivers. **Graphics Explained** Michael Evamy, 2009 Seven design categories are examined including work for new clients, good causes, wide open briefs, repeat business, low budget jobs, collaborations, and working to short deadlines. The book compares like with like by lining up seven projects, one from each category, by each of the seven featured designers. Cover p 4. *Rivers of Europe* Klement Tockner, Urs Uehlinger, Christopher T. Robinson, 2009-01-31 Based on the bestselling book *Rivers of North America*, this new guide stands as the only primary source of complete and comparative baseline data on the biological and hydrological characteristics of more than 180 of the highest profile rivers in Europe. Coverage on more than 180 European rivers. Summarizes biological, ecological, and biodiversity characteristics. Provides conservation managers with information to resolve conflicts between recreational use of rivers, their use as a water supply, and the need to conserve natural habitats. Data on river hydrology, maximum, minimum, and average flow rates, seasonal variation in water flow. Numerous full-color photographs. Information on the underlying geology and its affect on river behaviour. **Pyrites, Mineral, Louisa County, Va** Robert Carnes Hickman, 1947. **Climate Change and Armed Conflict** James R. Lee, 2009-09-10 This book examines the evolution of the relationship between climate change and conflict and attempts to visualize future trends. Owing to the accumulation of greenhouse gases in the atmosphere, current trends in climate change will not appreciably alter over the next half century, even if drastic action is taken now. Changes in climate will produce unique types and modes of conflict, redefine the value of important resources, and create new challenges to maintaining social order and stability. This book examines the consequences of climate change and argues that it has and will produce two types of different types of conflict: cold wars and

hot wars Cold wars will occur in northern and southern latitudes as warming draws countries into possible conflict due to expanding interests in exploiting new resources and territories inter state conflict Hot wars will break out around the equator as warming expands and intensifies dry areas increasing competition for scarce resources intra state conflict Conflict is not inevitable but it will also be a consequence of how states international institutions and people react to changes in climate Climate change and conflict have always shaped human experiences This book lays out the parameters of the relationship shows its history and forecasts its trends offering future conditions and opportunities for changing the historical path we are on This book will be of great interest for students of climate change and environmental security peace and conflict studies and IR security studies in general James R Lee is a Professor in the School of International Service American University Washington DC and Associate Director of American University s Center for Teaching Excellence He is author of several books on international relations including most recently Exploring the Gaps Vital Links Between Trade Environment and Culture 2000 **Arctic National Wildlife Refuge** U.S. Fish and Wildlife Service.
