Maritime

Archaeology Jeremy Green, 2016-12-05 Jeremy Green's systematic overview of maritime archaeology offers a step by step description of this fast growing field. With new information about the use of computers and Global Positioning Systems, the second edition of this handbook shows how to extract as much information as possible from a site, how to record and document the data, and how to act ethically and responsibly with the artifacts. Treating underwater archaeology as a discipline, the book demonstrates how archaeologists, looters, academics, and governments interact, and how the market for archaeological artifacts creates obstacles and opportunities for these groups. Well illustrated and comprehensive in its approach to the subject, this book provides an essential foundation for everybody interested in underwater environments, submerged land structures, and conditions created by sea level changes.

On-Camera Flash, 2015-10-19. Photographers are always looking for perfect light. Unfortunately, the quality of available light and the situations in which photos are created are rarely perfect. This is especially true when photographing weddings or portraits on location. So while finding beautiful existing light is every photographer's ideal, it isn't always possible. This is the point at which photographers tend to reach for a portable on-camera flash. Indeed, these intense

light sources can prove invaluable but only if you know how to use them effectively In the hands of an inexperienced photographer on camera flash will produce images that look flat and lifeless images with harsh shadows washed out skin tones cavernous black backgrounds and other unappealing visual characteristics In this book acclaimed wedding and portrait photographer Neil van Niekerk shows you how to avoid the pitfalls photographers new to speedlights often encounter so that you can produce professional images using on camera flash You l learn to use simple accessories to manipulate the quality of light from your flash and how to improve a lighting scenario by enhancing rather than overwhelming the existing light When the available light is too low and too uneven to be combined with flash he shows you how to override it completely with flash and with some thought and careful application of specialized techniques still get results that look great On camera flash is one of the most challenging light sources to master but with the techniques in this book you ll learn to use it with confidence For wedding and environmental portrait photographers who must work in ever changing lighting scenarios this can mean better images and better sales *The Encyclopaedia Britannica ...* ,1902 **The Photographic Journal of America** ,1916
