Sebastian Brünink

Small Area Estimates Of School Age Children In Poverty Evaluation Of Current Methodology:

Small-Area Estimates of School-Age Children in Poverty National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on National Statistics, 1998-05-01 The Panel on Estimates of Poverty for Small Geographic Areas was established by the Committee on National Statistics at the National Research Council in response to the Improving America's Schools Act of 1994 That act charged the U S Census Bureau to produce updated estimates of poor school age children every two years for the nation's more than 3 000 counties and 14 000 school districts The act also charged the panel with determining the appropriateness and reliability of the Bureau's estimates for use in the allocation of more than 7 billion of Title I funds each year for educationally disadvantaged children The panel's charge was both a major one and one with immovable deadlines The panel had to evaluate the Census Bureau's work on a very tight schedule in order to meet legal requirements for allocation of Title I funds As it turned out the panel produced three interim reports the first one evaluated county level estimates of poor school age children in 1993 the second one assessed a revised set of 1993 county estimates and the third one covered both county and school district level estimates of poor school age children in 1995 This volume combines and updates these three reports into a single reference volume *Small-Area Estimates of School-Age Children in Poverty* Panel on Estimates of Poverty for Small Geographic Areas, Committee on National Statistics, Commission on Behavioral and Social Sciences and Education, Division of Behavioral and Social Sciences and Education, National Research Council, 2001-01-30 The Panel on Estimates of Poverty for Small Geographic Areas was established by the Committee on National Statistics at the National Research Council in response to the Improving America's Schools Act of 1994 That act charged the U S Census Bureau to produce updated estimates of poor school age children every two years for the nation's more than 3 000 counties and 14 000 school districts The act also charged the panel with determining the appropriateness and reliability of the Bureau's estimates for use in the allocation of more than 7 billion of Title I funds each year for educationally disadvantaged children The panel's charge was both a major one and one with immovable deadlines The panel had to evaluate the Census Bureau's work on a very tight schedule in order to meet legal requirements for allocation of Title I funds As it turned out the panel produced three interim reports the first one evaluated county level estimates of poor school age children in 1993 the second one assessed a revised set of 1993 county estimates and the third one covered both county and school district level estimates of poor school age children in 1995 This volume combines and updates these three reports into a single reference volume

Small-Area Estimates of School-Age Children in Poverty National Research Council, Commission on Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Estimates of Poverty for Small Geographic Areas, 2001-02-16 The Panel on Estimates of Poverty for Small Geographic Areas was established by the Committee on National Statistics at the National Research Council in response to the Improving America's Schools Act of 1994 That act

charged the U S Census Bureau to produce updated estimates of poor school age children every two years for the nation s more than 3 000 counties and 14 000 school districts The act also charged the panel with determining the appropriateness and reliability of the Bureau s estimates for use in the allocation of more than 7 billion of Title I funds each year for educationally disadvantaged children The panel s charge was both a major one and one with immovable deadlines The panel had to evaluate the Census Bureau s work on a very tight schedule in order to meet legal requirements for allocation of Title I funds As it turned out the panel produced three interim reports the first one evaluated county level estimates of poor school age children in 1993 the second one assessed a revised set of 1993 county estimates and the third one covered both county and school district level estimates of poor school age children in 1995 This volume combines and updates these three reports into a single reference volume Analysis of Poverty Data by Small Area Estimation Monica Pratesi,2016-02-23 A

comprehensive guide to implementing SAE methods for poverty studies and poverty mapping There is an increasingly urgent demand for poverty and living conditions data in relation to local areas and or subpopulations Policy makers and stakeholders need indicators and maps of poverty and living conditions in order to formulate and implement policies re distribute resources and measure the effect of local policy actions Small Area Estimation SAE plays a crucial role in producing statistically sound estimates for poverty mapping This book offers a comprehensive source of information regarding the use of SAE methods adapted to these distinctive features of poverty data derived from surveys and administrative archives The book covers the definition of poverty indicators data collection and integration methods the impact of sampling design weighting and variance estimation the issue of SAE modelling and robustness the spatio temporal modelling of poverty and the SAE of the distribution function of income and inequalities Examples of data analyses and applications are provided and the book is supported by a website describing scripts written in SAS or R software which accompany the majority of the presented methods Key features Presents a comprehensive review of SAE methods for poverty mapping Demonstrates the applications of SAE methods using real life case studies Offers guidance on the use of routines and choice of websites from which to download them Analysis of Poverty Data by Small Area Estimation offers an introduction to advanced techniques from both a practical and a methodological perspective and will prove an invaluable resource for researchers actively engaged in organizing managing and conducting studies on poverty **Improving Health**

Research on Small Populations National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Health Care Services,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,2018-07-02 The increasing diversity of population of the United States presents many challenges to conducting health research that is representative and informative Dispersion and accessibility issues can increase logistical costs populations for which it is difficult to obtain adequate sample size are also likely to be expensive to study Hence even if it is technically feasible to study a small population it may not be easy to obtain the funding to do so In order to address the

issues associated with improving health research of small populations the National Academies of Sciences Engineering and Medicine convened a workshop in January 2018 Participants considered ways of addressing the challenges of conducting epidemiological studies or intervention research with small population groups including alternative study designs innovative methodologies for data collection and innovative statistical techniques for analysis

Developing and Evaluating Methods for Using American Community Survey Data to Support the School Meals Programs National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Estimating Children Eligible for School Nutrition Programs Using the American Community Survey, 2010-10-10 The National School Lunch Program and the School Breakfast Program administered by the Food and Nutrition Service of the U S Department of Agriculture USDA are key components of the nation's food security safety net providing free or low cost meals to millions of school age children each day Under the most commonly adopted provisions USDA reimburses districts for meals served on the basis of data collected in a base year during which applications are taken After 3 or 4 years applications must be taken again to establish new base year data unless the district provides evidence that local conditions have not changed A special provision that does not require applications to be taken every few years would reduce burden be more attractive to school districts and potentially increase student participation by expanding access to free meals To support the development of such a provision the Food and Nutrition Service asked the National Academies to study the technical and operational issues that arise in using data from the American Community Survey ACS a new continuous survey replacing the long form survey of the decennial census to obtain estimates of students who are eligible for free and reduced price meals for schools and school districts Such estimates would be used to develop claiming percentages that if sufficiently accurate would determine federal reimbursements to districts for the schools that provide free meals to all students under a new special provision that eliminates the base year requirements of current provisions

Methods to Foster Transparency and Reproducibility of Federal Statistics National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, 2019-03-01 In 2014 the National Science Foundation NSF provided support to the National Academies of Sciences Engineering and Medicine for a series of Forums on Open Science in response to a government wide directive to support increased public access to the results of research funded by the federal government However the breadth of the work resulting from the series precluded a focus on any specific topic or discussion about how to improve public access Thus the main goal of the Workshop on Transparency and Reproducibility in Federal Statistics was to develop some understanding of what principles and practices are or would be supportive of making federal statistics more understandable and reviewable both by agency staff and the public This publication summarizes the presentations and discussions from the workshop

Surveying Victims National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on National Statistics, Panel to Review the Programs of the Bureau

of Justice Statistics,2008-06-19 It is easy to underestimate how little was known about crimes and victims before the findings of the National Crime Victimization Survey NCVS became common wisdom In the late 1960s knowledge of crimes and their victims came largely from reports filed by local police agencies as part of the Federal Bureau of Investigation s FBI Uniform Crime Reporting UCR system as well as from studies of the files held by individual police departments Criminologists understood that there existed a dark figure of crime consisting of events not reported to the police However over the course of the last decade the effectiveness of the NCVS has been undermined by the demands of conducting an increasingly expensive survey in an effectively flat line budgetary environment Surveying Victims Options for Conducting the National Crime Victimization Survey reviews the programs of the Bureau of Justice Statistics BJS Specifically it explores alternative options for conducting the NCVS which is the largest BJS program This book describes various design possibilities and their implications relative to three basic goals flexibility in terms of both content and analysis utility for gathering information on crimes that are not well reported to police and small domain estimation including providing information on states or localities This book finds that as currently configured and funded the NCVS is not achieving and cannot achieve BJS s mandated goal to collect and analyze data that will serve as a continuous indication of the incidence and attributes of crime Accordingly Surveying Victims recommends that BJS be afforded the budgetary resources necessary to generate accurate measure of victimization

Analyzing Information on Women-Owned Small Businesses in Federal Contracting National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Steering Committee for the Workshop on Women-Owned Small Businesses in Federal Contracting,2005-03-28 It has been clear for at least 50 years the disadvantages that small businesses face in competing for U S government contracts The Small Business Act of 1953 created the Small Business Administration SBA an independent agency in the executive branch that counsels and assists specific types of small businesses including firms owned by minorities and other socially and economically disadvantaged individuals and firms owned by women Women owned small businesses however are underrepresented or substantially underrepresented in some industries In 2002 the SBA Office of Federal Contract Assistance for Women Business Owners CAWBO organized a draft study containing a preliminary set of approximations of the representation of women owned small businesses in federal prime contracts over 25 000 by industry Because of the past legal challenges to race and gender conscious contracting programs at the federal and local levels the SBA asked the Committee on National Statistics of the National Academies to conduct an independent review of relevant data and estimation methods prior to finalizing the CAWBO study The Steering Committee on Women Owned Small Businesses in Federal Contracting was created and charged with holding a workshop to discuss topics including the accuracy of data and methods to estimate the use of women owned small businesses in federal contracting and the definition of underrepresentation and substantial underrepresentation in designating industries for which preferential contracting programs might be warranted Analyzing

Information on Women Owned Small Businesses in Federal Contracting presents the committee's report as well as the recommendations that committees have made

Administrative Records for Survey Methodology Asaph Young Chun, Michael D. Larsen, Gabriele Durrant, Jerome P. Reiter, 2021-02-25 ADMINISTRATIVE RECORDS FOR SURVEY METHODOLOGY Addresses the international use of administrative records for large scale surveys censuses and other statistical purposes Administrative Records for Survey Methodology is a comprehensive guide to improving the quality cost efficiency and interpretability of surveys and censuses using administrative data research Contributions from a team of internationally recognized experts provide practical approaches for integrating administrative data in statistical surveys and discuss the methodological issues including concerns of privacy confidentiality and legality involved in collecting and analyzing administrative records Numerous real world examples highlight technological and statistical innovations helping readers gain a better understanding of both fundamental methods and advanced techniques for controlling data quality reducing total survey error Divided into four sections the first describes the basics of administrative records research and addresses disclosure limitation and confidentiality protection in linked data Section two focuses on data quality and linking methodology covering topics such as quality evaluation measuring and controlling for non consent bias and cleaning and using administrative lists The third section examines the use of administrative records in surveys and includes case studies of the Swedish register based census and the administrative records applications used for the US 2020 Census The book's final section discusses combining administrative and survey data to improve income measurement enhancing health surveys with data linkage and other uses of administrative data in evidence based policymaking This state of the art resource Discusses important administrative data issues and suggests how administrative data can be integrated with more traditional surveys Describes practical uses of administrative records for evidence driven decisions in both public and private sectors Emphasizes using interdisciplinary methodology and linking administrative records with other data sources Explores techniques to leverage administrative data to improve the survey frame reduce nonresponse follow up assess coverage error measure linkage non consent bias and perform small area estimation Administrative Records for Survey Methodology is an indispensable reference and guide for statistical researchers and methodologists in academia industry and government particularly census bureaus and national statistical offices and an ideal supplemental text for undergraduate and graduate courses in data science survey methodology data collection and data analysis methods

This is likewise one of the factors by obtaining the soft documents of this **Small Area Estimates Of School Age Children In Poverty Evaluation Of Current Methodology** by online.
