Focussing on the relatively few small firms which grew rapidly, this book originally published in 1993 uses face to face interviews as well as published records to identify and analyse the managerial factors most closely associated with successful small firms. The volume concentrates on the following key managerial issues: In what respects do the managerial backgrounds and aspirations of the founders of fast growth small firms differ from those of non fast growth small firms? How is the process of growth managed? What incentives, remuneration packages and communication systems are instituted? How do these characteristics and experiences differ in fast growth small firms from both the traditional small firm and large firm sector? To what extent is it possible to explain the relative economic performance of small firms in terms of differences in their ownership, organizational and management structures?

Entrepreneurship and SME Research Rik Donckels, Asko Miettinen, 2019-05-29. First published in 1997, the authors of the present volume provide brand new insights and empirical findings in the field of entrepreneurship and small business research. The writers have highlighted three different key themes: entrepreneurship start ups and growth and internationalisation. The priority of most countries is growth, competitiveness and employment. In this context, the relevance of promoting the creation of new enterprises and understanding the very nature and development of newly created and existing SMEs is becoming more important today. The role of entrepreneurship and SMEs for economic and social development, welfare and well being is going to be emphasised more than ever before. The same holds for research in these fascinating fields. This book gives an idea of the state of the art for the time being, with its increasing conceptual, methodological and empirical complexity and diversity.
