*Playing with Fire (Wisdom for Women Who Smoke)* Betty Bryenton,2004 Playing With Fire is a unique book that explores current issues surrounding the epidemic of smoking among women This is an extremely important topic today because for the first time in our history young women are more likely than men to become smokers Cancer of the lung is now one of the major causes of cancer deaths among women and women now account for more than half the new cases of lung cancer each year The future looks bleak for it is predicted by the World Health Organization that deaths from lung cancer among women will double over the next twenty years This is in addition to the loss optimum health due to smoking Playing With Fire helps to explain the reasons for the current pattern of smoking among women It is the hypothesis of this book that while the lives of women have changed dramatically over the past quarter century the advances that women have made economically and socially have not made our world so much a better place as a more stressful one New roles and responsibilities are layered on top of the older more traditional ones and consequently women are suffering the effects of burnout as never before Cigarette smoking is an effective way of self medicating to alleviate the pain and stress of our daily lives Playing With Fire is unique in that it takes a compassionate view of women who smoke and challenges them to explore deeper issues in their lives something vitally important in long term smoking cessation The book validates women s experiences and provides them with a context for why they feel the way they do which gives meaning to why they smoke While supporting women in their personal choices to smoke or not to smoke it encourages them to seriously consider the risks involved and to consider ways of improving their situation and self care practices The beauty of Playing With Fire is that it does not preach or scold but rather takes readers on a journey of self discovery that will help women to understand their

lives and motives for smoking as well as the possibility of personal change and power It is a book that explores the creation of a better world through the individual's acceptance of and love for the self and the adoption of healthy self care practices

The Wounds of Exclusion Colleen Reid, 2017-07-28 This participant observer study chronicles the stories of a group of poor Canadian women their experience with exclusion by health and social service providers and their involvement in a feminist action research project

**Can't Buy My Love** Jean Kilbourne, 2012-06-26 When was the last time you felt this comfortable in a relationship An ad for sneakers You can love it without getting your heart broken An ad for a car Until I find a real man I'll settle for a real smoke A woman in a cigarette ad Many advertisements these days make us feel as if we have an intimate even passionate relationship with a product But as Jean Kilbourne points out in this fascinating and shocking exposé the dreamlike promise of advertising always leaves us hungry for more We can never be satisfied because the products we love cannot love us back Drawing upon her knowledge of psychology media and women's issues Kilbourne offers nothing less than a new understanding of a ubiquitous phenomenon in our culture The average American is exposed to over 3 000 advertisements a day and watches three years worth of television ads over the course of a lifetime Kilbourne paints a gripping portrait of how this barrage of advertising drastically affects young people especially girls by offering false promises of rebellion connection and control She also offers a surprising analysis of the way advertising creates and then feeds an addictive mentality that often continues throughout adulthood

*Transforming Addiction* Lorraine Greaves, Nancy Poole, Ellexis Boyle, 2015-04-10 Choice Highly Recommended Read Addiction is a complex problem that requires more nuanced responses Transforming Addiction advances addictions research and treatment by promoting transdisciplinary collaboration the integration of sex and gender and issues of trauma and mental health The authors demonstrate these shifts and offer a range of tools methods and strategies for responding to the complex factors and forces that produce and shape addiction In addition to providing practical examples of innovation from a range of perspectives the contributors demonstrate how addiction spans biological social environmental and economic realms Transforming Addiction is a call to action and represents some of the most provocative ways of thinking about addiction research treatment and policy in the contemporary era

**What's Wrong With Addiction** Helen Keane, 2013-04-01 This is an impressive work carefully structured researched and written a refreshingly lucid account that is both intellectually stimulating and professionally helpful Janet McCalman Addicts are generally regarded with either pity or grave disapproval But is being addicted to something necessarily bad These attitudes are explicit both in contemporary medical literature and in popular self help texts We categorise addiction as unnatural diseased and self destructive We demonise pleasure and desire and view the addict as physically and morally damaged Helen Keane's thought provoking text examines these assumptions in a new light In asserting that the wrongness of addiction is not fixed or indeed obvious she presents a refreshing challenge to more conventional accounts of addiction She also investigates the notion that people can be addicted to eating love and sex just as they are to drugs and alcohol What's

Wrong with Addiction shows that most of our ideas about addiction take certain ideals of health and normality for granted. It exposes strains in our society's oppositions between health and disease, between the natural and the artificial, between order and disorder, and between self and other.

**Scratching the Surface of Bioethics**, 2003-01-01. Is bioethics only about medicine and health care? Law, Philosophy, Social issues. No, on all accounts. It embraces all these and more. In this book, fifteen notable scholars from the North West of England critically explore the main approaches to bioethics and make a scratch on its polished surface.

**Anthropology of Tobacco**, Andrew Russell, 2019-03-04. Tobacco has become one of the most widely used and traded commodities on the planet. Reflecting contemporary anthropological interest in material culture studies, *Anthropology of Tobacco* makes the plant the centre of its own contentious global story in which, instead of a passive commodity, tobacco becomes a powerful player in a global adventure involving people, corporations, and public health. Bringing together a range of perspectives from the social and natural sciences as well as the arts and humanities, *Anthropology of Tobacco* weaves stories together from a range of historical, cross-cultural, and literary sources and empirical research. These combine with contemporary anthropological theories of agency and cross-species relationships to offer fresh perspectives on how an apparently humble plant has progressed to world domination and the consequences of it having done so. It also considers what needs to happen if, as some public health advocates would have it, we are seriously to imagine a world without tobacco. This book presents students, scholars, and practitioners in anthropology, public health, and social policy with unique and multiple perspectives on tobacco-human relations.

**High Culture**, Anna Alexander, Mark S. Roberts, 2012-02-01. This is the first comprehensive text to address addiction and its multiple effects on and extensions into art, literature, philosophy, and psychology. Most research into addiction has taken place within the disciplines of medicine, criminology, politics, and social psychology. When seen from a broad cultural perspective, however, addiction emerges directly alongside modernity, haunting its various discourses of digression, dissent, and the transcendence of the commonplace. Who could even imagine modern writing without the addictive, visionary excesses of writers like Baudelaire, DeQuincey, Poe, Burroughs, or Artaud? Or, for that matter, modern culture without its outsiders, its incorrigible addicts, its defaced subjects, smokers, users, overeaters, alcoholics, the insane? Taking a cultural studies approach to addiction, *High Culture* offers a readable and accessible collection of essays on these socially marginalized practices and discourses so central to modernity.

**Designing and Conducting Gender, Sex, and Health Research**, John L. Oliffe, Lorraine Greaves, 2011-04-18. This book is the first textbook dedicated to critically examining gender and sex in study designs, methods, and analysis in health research. In order to produce ethical, accurate, and effective research findings, it is vital to integrate both sex/biological characteristics and gender/socially constructed factors into any health study. This book draws attention to some of the methodological complexities in this enterprise and offers ways to thoughtfully address these by drawing on empirical examples across a range of topics and disciplines. *Designing and Conducting Gender, Sex, and Health Research* is an

invaluable resource for students undertaking research in health sciences medicine nursing gender studies women s studies epidemiology health policy psychology and sociology From John L Oliffe and Lorraine Greaves **Tobacco** Peter Boyle,2010-08-19 Tobacco is ranked as one of the major public health disasters of modern times This book pulls together the science of tobacco related diseases with the policy of tobacco control to offer a comprehensive preventive medicine public health approach Freedom to Smoke Jarrett Rudy,2005-09-30 In the late Victorian era smoking was a male habit and tobacco was consumed mostly in pipes and cigars By the mid twentieth century advertising and movies had not only made it acceptable for women to smoke but smoking had become a potent symbol of their emancipation From mass cigarette production in 1888 to the first studies linking cigarettes to lung cancer in 1950 The Freedom to Smoke explores gender and other key issues related to smoking in Montreal including the arrival of big tobacco first attempts to ban the cigarette wartime tobacco funds French Canadian smoking habits rituals of manliness and the growing respectability of women smokers none of which have been examined by historians Jarrett Rudy argues that while people smoked for highly personal reasons their smoking rituals were embedded in social relations and shaped by dominant norms of taste and etiquette The Freedom to Smoke examines the role of the tobacco industry health experts churches farmers newspapers the military the state and smokers themselves A pioneering city based study it weaves Western understandings of respectable smoking through Montreal s diverse social and cultural fabric Rudy argues that etiquette gave smoking a political role reflecting and serving to legitimize beliefs about inclusion exclusion and hierarchy that were at the core of a transforming liberal order

*Tobacco and Public Health* Peter Boyle,2004 This book comprehensively covers the science and policy issues relevant to one of the major public health disasters of modern times It pulls together the aetiology and burden of the myriad of tobacco related diseases with the successes and failures of tobacco control policies The book looks at lessons learnt to help set health policy for reducing the burden of tobacco related diseases The book also deals with the international public health policy issues which bear on control of the problem of tobacco use and which vary between continents The editors are an international group distinguished in the field of tobacco related diseases epidemiology and tobacco control The contributors are world experts drawn from the various clinical fields This major reference text gives a unique overview of one of the major public health problems in both the developed and developing world The book is directed at an international public health and epidemiology audience including health economists and those interested in tobacco control Smoking and Pregnancy Laury Oaks,2001 Examines smoking as a public health concern focusing on harm to the fetus and fetal personhood and also challenges moral policing of smoking women who are pregnant **Challenging Women's Agency and Activism in Early Modernity** Merry Wiesner-Hanks,2025-10-01 Examining women s agency in the past has taken on new urgency in the current moment of resurgent patriarchy Women s Marches and the global MeToo movement The essays in this collection consider women s agency in the Renaissance and early modern period an era that also saw both increasing patriarchal

constraints and new forms of women's actions and activism. They address a capacious set of questions about how women from their teenage years through older adulthood asserted agency through social practices, speech acts, legal disputes, writing, viewing and exchanging images, travel and community building. Despite family and social pressures, the actions of girls and women could shape their lives and challenge male-dominated institutions. This volume includes thirteen essays by scholars from various disciplines which analyze people, texts, objects and images from many different parts of Europe as well as things and people that crossed the Atlantic and the Pacific. **Experiencing Social Research** Kerry J. Strand, Gregory L.

Weiss, 2020-08-11 This reader introduces students to the social research process by pairing 16 published research articles with candid interviews with the lead researcher on each study. **Making It Better** Lorraine Greaves, Ann Pederson, Nancy Poole, 2014 In this innovative collection, leading thinkers in clinical medicine, sociology, epidemiology, kinesiology, education and public policy reveal how health promotion is failing communities by failing women. Despite a longstanding consensus that social inequalities shape global patterns of illness and opportunities for health, mainstream health promotion frameworks continue to ignore gender at relational, household, community and state levels. Exploring the ways in which gendered norms affect health and social equity for all human beings, *Making It Better* invites us to rethink conventional approaches to health promotion and to strive for transformative initiatives and policies. Offering practical tools and evidence-based strategies for moving from gender integration to gender transformation, this anthology is required reading for policymakers, health promotion and healthcare practitioners, researchers, community developers and social service providers.

A Framework of Intersectional Risk Theory in the Age of Ambivalence Katarina Giritli Nygren, Anna Olofsson, Susanna Öhman, 2019-12-11 This book brings feminist theories and concepts to the sociology of risk in an attempt to carve out a framework for intersectional risk theories in times of ambivalence. The authors purport that risk is pervasive in the Global North and is fast becoming a hegemonic governing principle. In order to understand this crucial aspect of society, sociological risk theories and risk analysis must go beyond power and social inequalities to incorporate an intersectional risk approach that takes into account gender, race and other critical perspectives. Their proposed framework will provide the tools to assess how risk is situated in different configurations of power, revealing cracks and openings in the web of power and rethinking risk governance in contemporary society. By utilising an intersectional and nuanced analysis, the everyday understanding, practices and discourses of risk can be explored and better understood. This book will be of interest to scholars and students who value the importance of establishing interdisciplinary networks between risk theory, sociology, politics and more in order to study the contemporary world.
