David, 1994-12-01 This book explores the practice of counselling not only in the context of traditional ministries of pastoral care within the Christian Church but also in the context of other world religions and among counsellors with a concern for the spiritual dimension of life A detailed account is given of the development of pastoral counselling in Britain parallel movements in other major world religions are examined An attempt is made to engage sympathetically with the theory and practice of a wide range of approaches to counselling in a context which embraces both the rapidly growing Christian counselling movement and more humanistic understandings of spirituality The author draws out the implications of

metaphors which have shaped our understanding of pastoral care and counselling finding in a narrative understanding of religious faith and in the spiritual journey of Thomas Merton a model which respects the contribution of the secular therapies and affirms the integrating potential of faith This book will be of interest to clergy and lay people in churches and other faiths who seek an understanding of counselling in pastoral and spiritual contexts It will also have more general appeal to practitioners who wish to explore the relationship of counselling in this context to forms of counselling elsewhere

Consciousness Reconnected Derek Steinberg, 2018-08-17 What is consciousness The answer to this question has eluded thinkers for millennia In modern times scientists have struggled to find a complete answer often hampered by the limitations of their particular specialisms Derek Steinberg's unique approach constructs a multi faceted model of mind involving science and the arts from which the sense of personal identity emerges In a masterful tour de force he establishes links between otherwise distinct or even conflicting disciplines In this radical departure the author argues that the arts literature and human culture

in the broadest sense make their contributions to understanding consciousness and the sense of self though they are rarely acknowledged in mainstream debate Rather than focusing only on what lies between the ears Steinberg casts a wide net He explores the connections between sciences and the humanities as he takes the debate into new areas This book is fascinating and enlightening reading for everyone interested in human nature and the psyche as well as for students and professionals in the fields of neuroscience psychiatry psychology medicine social science anthropology philosophy and the arts for whom the book is a breakthrough in the challenge of cross disciplinary collaboration
