Laufer, 2018-05-08 As our knowledge of the change and turmoil of adolescence grows so the number of issues on which psychotherapeutic techniques can shed light increases this monograph focuses on one of the most urgent It provides not only practical insights into dealing with suicidal or potentially suicidal adolescents with an emphasis on prevention of the problem as early as possible but also a model of the way in which adolescents may find themselves becoming suicidal Suicide attempts are rare in childhood they are generally triggered after puberty by the adolescent's reaction to changes in his newly sexually mature body It is the body that is perceived as the enemy and sometimes the death of the body seems the only recourse The adolescent who actually attempts to kill himself no longer doubts his actions or his solutions on his mental creations At the time of his decision to kill himself he is taken over by his need for peace more than by the fact of his own death

Adolescent Suicidal Behavior David K. Curran, 2014-05-12 First published in 1987 This comprehensive book addresses the problem of adolescent suicidal behavior in America today It devotes a great deal of attention to sublethal acts or suicide attempts rather than committed suicides This study establishes a progression that discusses the scope and magnitude of the problem and an exploration of the meaning and reasons for adolescent suicide in the individual case **Family Therapy**

with Suicidal Adolescents Anthony P. Jurich, 2012-01-26 This book describes a blend of insight oriented behavioral and strategic family therapy which the author has developed over thirty four years of dealing with suicidal adolescents It aims not to replace other forms of therapy but to augment the therapist's own therapeutic style The book offers an informative and personally told story bringing together scholarship and meaningful glimpses into the thought processes of suicidal youth Written in an understandable friendly and practical style it will appeal to those in clinical practice as well as graduate level students pursuing clinical work Evaluating and Treating Adolescent Suicide Attempters Anthony Spirito, James C.

Overholser, 2003-01-05 Evaluating and Treating Adolescent Suicide Attempters provides a comprehensive overview of the emotional behavioral and cognitive characteristics of adolescents who have attempted suicide Each chapter opens with a case study vignette from the author's extensive clinical files followed by a summary of the empirical literature Assessment and treatment practices close each chapter While suicide is the third largest killer of adolescents most suicide attempts do

not result in death Therefore the treatment of the suicide attempter following the attempt becomes a significant part of the clinician's work with these adolescents Moreover the precursors and behavioral markers for a suicide attempt become important signals for the school counselor youth worker or therapist This book also includes assessment measures to use when evaluating an adolescent who has attempted suicide Includes an outline form of an assessment battery for adolescents who have attempted suicide Analyzes and discusses treatment and case studies Presents detailed descriptions of specific therapy techniques useful with adolescents who attempt suicide Includes succinct reviews of the literature ways to measure relevant factors related to suicidal behavior tips for clinicians and reviews of pertinent assessment measures

Preventing Adolescent Suicide Dave Capuzzi, Larry Golden, 2013-08-21 First published in 1988 Many people absolutely reject suicide under any circumstances However most of us can sympathize with the suicidal motives let's say of an elderly person afflicted with terminal cancer But it disturbs the core of our being that a child would find this life so empty of hope that death would be preferable Teenagers are so full of pain pleasure sexuality energy curiosity idealism bravado vulnerability rebellion and promise This book comes to grips with the reality of adolescent suicide In the book are fifteen chapters organized under five major parts

Adolescent Suicide Group for the Advancement of Psychiatry. Committee on Adolescence, 1996 Even the most skilled therapist may underestimate suicide potential Careful assessment and competent psychiatric intervention cannot always predict the suicidality of a particular person Adolescent Suicide GAP Report 140 presents techniques that allow psychiatrists and all those caring for the health and welfare of adolescents to respond to signals of distress with timely therapeutic intervention It also suggests measures of anticipatory prevention Adolescent Suicide presents an overview of adolescent suicidal behavior It explores risk factors the identification and evaluation of the suicidal adolescent and approaches to therapy It offers both historical and cross cultural perspectives the relevance of suicide to adolescent development mental health training needs regarding suicidality and related issues such as public health policies and medicolegal concerns The risk of suicide presents a unique crisis in adolescent development For this reason all
