The American Dream Lawrence R. Samuel, 2012-08-27 There is no better way to understand America than by understanding the cultural history of the American Dream Rather than just a powerful philosophy or ideology the Dream is thoroughly woven into the fabric of everyday life playing a vital role in who we are what

we do and why we do it No other idea or mythology has as much influence on our individual and collective lives Tracing the history of the phrase in popular culture Samuel gives readers a field guide to the evolution of our national identity over the last eighty years Samuel tells the story chronologically revealing that there have been six major eras of the mythology since the phrase was coined in 1931 Relying mainly on period magazines and newspapers as his primary source material the author demonstrates that journalists serving on the front lines of the scene represent our most valuable resource to recover unfiltered stories of the Dream The problem however is that it does not exist the Dream is just that a product of our imagination That it is not real ultimately turns out to be the most significant finding about the American Dream and what makes the story most compelling *The IQ Mythology* Elaine Menesh, Harry Menesh, 1991-04-20 Ever since Alfred Binet carried out a 1904 commission from France's minister of public instruction to devise a means for deciding which pupils should be sent to what would now be called special education classes IQ scores have been used to label and track children Those same scores have been cited as proof that different races classes and genders are of superior and inferior intelligence The Meneshes make clear that from the beginning IQ tests have been fundamentally biased Offered as a means for seeking solutions to social problems the actual measurements have been used to maintain the status quo Often the most telling comments are from the test makers themselves whether Binet little girls weak in orthography are strong in sewing and capable in the instruction concerning housekeeping and all things considered this is more important for their future or Wigdor and Garner naive use of intelligence tests to place children of linguistic or racial minority status in special education programs will not be defensible in court Among the disturbing facts that the authors share is that there is mounting political pressure for more tests and testing despite a court trial in which the judge stated that defendants expert witnesses even those clearly affiliated with the companies that devise and distribute the standardized intelligence tests agreed with one exception that we cannot truly define much less measure intelligence The testing firms have responded to this carefully orchestrated need with new products that extend even to the IQ testing of three month old infants The authors stress that if the testers prevail there is little doubt that these and similar tests would be used ad infinitum to justify superior and inferior education along class and racial lines **Social Justice** R.L. Brahm, 2012-12-06 The Conference on Social Justice was the second in the series of conferences organized under the auspices of the Departments of Economics Philosophy and Political Science of The City College of The City University of New York This conference was made possible under a generous grant from the Morton Globus Fund Its success was assured by the participation of distinguished scholars and educators from the organizing departments as well as from a number of other American institutions of higher learning Not all who participated are included in this volume drawn from the conference but we are grateful to all equally for their contribution as discussants On behalf of the chairmen and members of the participating departments I would like to express thanks to the panelists for making their papers available for publication I would also like to express my gratitude to Mr Morton Globus for his

generosity and to Acting President Arthur Tiedemann and Professor Jerome Siegel the Acting Dean of the Social Science Division of The City College for their consistent support of this project Finally I would like to express my appreciation to the publisher Martinus Nijhoff Publishing for its patience and cooperation and to my wife Elizabeth Braham for her advice and editorial assistance
